CROP SCIENCE

Crop breeders, plant geneticists and physiologists, and workers in related areas will find *Crop Science* a source of valuable articles in their branches of science. This bimonthly journal carries reports of research in the genetics, physiology, ecology, breeding and management of field crops, turf-grasses, pastures and ranges, and in seed technology. It is published by the Crop Science Society of America.

\$14.00 per year in U.S. and Canada.
\$15.00 per year elsewhere.

Crop Science Society of America,
677 S. Segoe Rd,
Madison 11, Wisconsin, U.S.A.

Other Cambridge Journals

ANNALS OF APPLIED BIOLOGY

Includes original papers and book reviews on the application of biology to agriculture, forestry, horticulture, and other subjects. Published bi-monthly. Subscription £3. 15s. per volume of 3 parts. Single parts 30s.

BRITISH JOURNAL OF NUTRITION

AND

PROCEEDINGS OF THE NUTRITION SOCIETY

The *Journal* contains accounts of original work in all branches of nutrition, including medical and agricultural. The *Proceedings* reports discussions on several topics of interest to nutrition scientists. Combined subscription rate for 1965 is £9 for 4 parts of the *Journal*, and two parts of the *Proceedings*. Single parts of either 45s.

JOURNAL OF DAIRY RESEARCH

Publishes the results of original research in dairy science and cognate subjects. The *Journal* is issued three times a year. Annual subscription 80s. Single parts 30s.

Copies of these and other Cambridge Journals may be ordered through your Bookseller or direct from the Cambridge University Press, Bentley House, 200 Euston Road, London, N.W. 1.

DO SCIENTISTS NEED A COMPREHENSIVE INDEX TO ALL OF SCIENCE?

When we asked scientists this question recently, most of them replied yes — a few said no. If you are among the few who are perfectly satisfied with the "selective" approach of conventional indexing systems, stop right here. However, if you, along with the majority, feel that improved methods and comprehensiveness are needed in information retrieval and dissemination, read on.

Every research scientist has, on one occasion or another, been stumped by the complex problems of searching the scientific literature. Today's search requirements are hobbled by the limitations of traditionally organized indexing systems.

At the Institute for Scientific Information, we have tested and developed a new dimension in indexing. To this we have added comprehensive coverage, resulting in a unique tool for information discovery. We call it Science Citation Index.

The Science Citation Index instantly identifies the most recent publications referring to a particular work since its publication. The Science Citation Index provides the scientist with an improved, novel starting point: the specific paper or book of a specific author . . . and from there the searcher is brought forward in time to current papers relating to the earlier work.

Revolutionary? Invaluable? We think so and we think you will too after you've had an opportunity to review descriptive material on this new technique. Write us now and we'll send details by return mail —without obligation, of course.

announcing **EXPERIMENTAL AGRICULTURE**

Experimental Agriculture is a journal concerned with the whole range of agricultural problems in developing countries. It aims to provide a link between academic research and agricultural practice. It will publish:

authoritative and up-to-date reviews of new developments in scientific agriculture;

accounts of new experimental techniques, especially those concerned with methods of studying the agricultural environment, the relative merits of new crops, varieties and cultural operations and the application of biometry to field experimentation;

contributions from developing countries on the specific problems of increasing agricultural production, especially where this is at present based on peasant subsistence agriculture;

papers on the more technical and economic aspects of farming systems, especially where these bear on the problems of changing an existing system;

descriptions of successful experiments in extension methods, cooperation, community projects and related topics concerned with the sociological aspects of agricultural improvements.

Experimental Agriculture is a quarterly journal published by Cambridge University Press. It is the successor to *The Empire Journal of Experimental Agriculture*.

The subscription price is £3. 15s. (U.S.A. \$13.50) including postage; single parts are available at £1. 5s. each (U.S.A. \$4.50). Orders may be sent to any bookseller or subscription agent, or direct to Cambridge University Press.

JOURNAL OF REPRODUCTION AND FERTILITY

The Journal publishes original papers, abstracts of Proceedings, and occasionally reviews and bibliographies, dealing with the morphology, physiology, biochemistry and pathology of reproduction in man and animals, and with the biological, medical and veterinary problems of fertility and lactation. Numbers are issued bimonthly to give two volumes a year.

Papers appearing during 1964 include:

- K. T. KIRTON, H. D. HAFS and A. G. HUNTER. Levels of some normal constituents of bull semen during repetitive ejaculation.
- J. C. WALLACE and R. G. WALES. Effect of ions on the metabolism of ejaculated and epididymal ram spermatozoa.
- J. C. WALLACE and A. K. LASCELLES. Composition of testicular and epididymal lymph in the ram.
- A. G. HUNTER and H. D. HAFS. Some physicochemical properties of saline-soluble proteins in bovine spermatozoa.
- T. H. BRINSFIELD, H. W. HAWK and H. F. RIGHTER. Interaction of progesterone and oestradiol on induced leucocytic emigration in the sheep.
- R. D. BAKER, M. L. VANDEMARK, C. N. GRAVES and H. W. NORTON. Effects of pilocarpine and atropine on copulatory behaviour, ejaculation and semen composition in the bull.
- F. K. KRISTJANSSON. Transferrin types and reproductive performance in the pig.
- R. E. MANCINI, A. ALONSO, J. BARQUET, B. ALVAREZ and M. NEMIROVSKY. Histoimmunological localization of hyaluronidase in the bull testis.
- G. M. H. WAITES and B. P. SETCHELL. Effect of local heating on blood flow and metabolism in the testis of the conscious ram.
- B. C. WENTWORTH and W. J. MELLEN. Active immunity induced and spermatogenesis suppressed by testicular antigen in the male Japanese quail.
- N. KOVAČIĆ. Biological characteristics of pituitary and placental hormones.

Editorial correspondence should be sent to The Executive Editor, Journal of Reproduction and Fertility, 8 Jesus Lane, Cambridge, England, and business correspondence to the publishers.

The subscription rate for 1965 is £6 per volume or £12 per year (two volumes). U.S.A. and Canada \$20.00 per volume or \$40.00 per year
