

INDEX OF SUBJECTS

- Aerosols, bacterial, experiments with radioactive spores on respiratory retention of, 372
 Amino-acids, protective action against the effect of heat on complement, 140
 Anaerobic spore-bearing organisms, effect on validity of presumptive coliform testing of water, 268
 Animals, laboratory, feeding and breeding of, and the use of autoclaved stock diet for breeding mice, 258
 Anthrax spores, influence of particle size on respiratory infection with, 359
 Antibodies, urinary, origin of, 245
 Antibody, local production of, in cow uterus sensitized against *Trichomonas foetus* antigen, 405
 Bacteriology of dehydrated fish, 347
 Bacteriophage inhibition by extracts from phage-insensitive bacteria of the genus *Pseudomonas*, 108
Bacterium coli counts of non-chlorinated water supplies, effect of sodium thiosulphate on, 572
Bacterium coli counts of water supplies, effect of storage on, 559
Bacterium coli, improved methods for determining most probable number in water, 468
Bacterium coli O Group 55, differentiation of sero-fermentative types in, 39
 Bedclothes, evaluation of methods of applying oil to, 502
 Canicola fever, epidemiology of, 330
 Chloramphenicol in the gut, some effects of, 322
Clostridium welchii food poisoning, 75
Clostridium welchii, routine typing of, 102
 Complement fixation, influenza, simple quantitative micro-method of, 492
 Complement, protective action of some amino acids against the effect of heat on, 140
 Conglutination phenomenon and the production of immuno-conglutinin in rabbits, 509
 Cow uterus, sensitization of, against *Trichomonas foetus* and local production of antibody, 405
 Drying, atmospheric, influence of, on survival of wound flora, 203
 Epizootic amongst Manx shearwaters, studies on causative agent of, 195
 Fish, dehydrated, bacteriology of, 347
 Food poisoning, *Clostridium welchii*, 75
 Foot-and-mouth disease vaccine, use of culture virus in preparation of, 546
Fusiformis, observations upon the cytology and life history of, 49
 Gerbils (*Tatera brantsi*), epizootic cycle in, 427
 Glycine, inhibition by various agents of the lysis of *Bacterium coli* by, 215
 Gut, some effects of chloramphenicol, in 322
 H-substance, reaction with rabbit antisera, 55
 Haemolytic streptococci, transmission of, 278
 Hepatitis, infective and arsenotherapy, amongst naval personnel, 145
 Immuno-conglutinin in rabbits, production of, 509
 Influenza complement fixation, simple quantitative micro-method of, 492
 Lakes and estuaries, some chemical and bacterial characteristics of bottom deposits from, 185
Leptospira icterohaemorrhagiae, infection rates of *Rattus norvegicus* with, 416
 Leucocytes, effect of tuberculin on, 340
 Lysis of *Bacterium coli* by glycine, inhibition by various agents of, 215
 'Muller's phenomenon', studies on, 125
 Mutation, bacterial, statistical concepts in the theory of, 162
 Myxomatosis in Australian wild rabbits, 225
 Naval personnel, infective and arsenotherapy hepatitis amongst, 145
 Oil, evaluation of methods of applying to bedclothes, 502

- Paratyphoid fever, duration of infection in, 532
- Particle size, influence of, on respiratory infection with anthrax spores, 359
- Penicillin sensitivity of *Staphylococcus aureus* in the nose in infants and their mothers, 64
- Phage typing of *Staphylococcus aureus*, 1
- Plague, in South Africa, 427
- Proteoclast ('Muller's phenomenon'), studies on, 125
- Pseudomonas* genus, bacteriophage inhibition by extracts from phage-insensitive bacteria of, 108
- Rabbit antisera, reaction with H-substance, 55
- Rabbits, myxomatosis of, 225
- Radioactive spores, experiments on respiratory retention of bacterial aerosols with, 372
- Rats and mice, feeding behaviour of, 35
- Rats, food preferences of, 16
- Rats, sewer, population dynamics of, 483
- Rattus norvegicus*, infection rates with *Leptospira icterohaemorrhagiae* in Great Britain, 416
- Respiratory infection with anthrax spores, influence of particle size on, 359
- Respiratory retention of bacterial aerosols, experiments with radio-active spores, 372
- Rheumatic children, incidence and importance of streptococci in an institution for, 157
- Rheumatic fever in children, social distribution of, 450
- Rickettsia burneti*, variation in complement-fixing activity of, during egg adaptation, 311
- Shearwaters, Manx, studies on causative agent of an epizootic amongst, 195
- Singapore, thermal comfort in, 386
- Sodium thiosulphate, effect of, on the coliform and *Bacterium coli* counts of non-chlorinated water supplies, 572
- South Africa, plague in, 427
- Spores, radioactive, experiments on respiratory retention of bacterial aerosols with, 372
- Staphylococcus aureus*, incidence and penicillin sensitivity of, in the nose in infants and their mothers, 64
- Staphylococcus aureus*, phage typing of, 1
- Storage, effect of, on the coliform and *Bacterium coli* counts of water samples, 559
- Streptococci, haemolytic, transmission of, 278
- Streptococci, incidence and importance of, in an institution for rheumatic children, 157
- Streptococcus faecalis*, enumeration of, with special reference to polluted waters, 458
- Streptococcus faecalis*, improved methods for determining the most probable number in water, 468
- Tatera brantsi*, epizootic cycle of plague in, 427
- Tetanus toxin and antitoxin, interaction of, 293
- Thermal comfort in warm and humid atmospheres, 386
- Toxin and antitoxin, tetanus, interaction of, 293
- Toxoplasma, infection at different ages, 478
- Trichomonas foetus* antigen, sensitization of cow uterus against, and local production of antibody, 405
- Tuberculin, effect on sensitized and normal leucocytes, 340
- Tuberculin sensitivity of epithelial cells *in vitro*, 541
- Typhoid fever, second attacks of, 260
- Urinary antibodies, origin of, 245
- Virus, culture, in preparation of foot and mouth disease vaccine, 546
- Water, effect of anaerobic spore-bearing organisms on the validity of the presumptive coliform test, 268
- Water, improved methods of determining most probable number of *Bacterium coli* and *Streptococcus faecalis* in, 468
- Water supplies, effect of storage on coliform and *Bacterium coli* counts of, 559
- Water supplies, non-chlorinated, effect of sodium thiosulphate on the coliform and *Bacterium coli* count of, 572
- Wound flora, influence of atmospheric drying on the survival of, 203
