

Instructions for Contributors

Zygote is an international journal dedicated to the rapid publication of original research in early embryology. It covers interdisciplinary studies on gametogenesis through fertilization to gastrulation in animals and humans. The scope has been expanded to include clinical papers, molecular and developmental genetics. While the editors will favour work describing fundamental processes in the cellular and molecular mechanisms of animal development, and, in particular, the identification of unifying principles in biology, new technologies, review articles, debates and letters will become a prominent feature.

Subjects covered include gametogenesis, sperm–oocyte interaction, gamete and embryo physiology, cell polarity, cell–cell interactions, nuclear transfer, haploidization, molecular and developmental genetics, in-vitro fertilization, stem cell and cryoconservation technologies.

All manuscripts must be submitted online at:
<http://mc.manuscriptcentral.com/zygote>

Submission of a paper will be taken to imply that it is unpublished and it is not being considered for publication elsewhere. Authors of articles published in the journal assign copyright to Cambridge University Press (with certain rights reserved) and you will receive a copyright assignment form for signature on acceptance of your paper.

There is no formal restriction on length; however, original articles and reviews of less than 15000 words are likely to appear sooner than longer ones. Short communications should not exceed 1500 words and News and Views Commentaries 500 words.

Preparation of manuscripts

Manuscripts should be organised as follows: Title page (with full names and addresses of all authors, a running headline of up to 35 characters, and a contact address with telephone number and email address), an Abstract of not more than 250 words followed by 5 Keywords, Introduction, Materials and Methods, Results, Discussion (combined Results and Discussion may be used for short papers), Acknowledgements, References, Endnotes, Tables and Figure Legends.

Manuscripts should be prepared using SI units

CAMBRIDGE UNIVERSITY PRESS

UPH, Cambridge CB2 8BS, United Kingdom

32 Avenue of the Americas, New York, NY 10013–2473, USA

477 Williamstown Road, Port Melbourne, VIC 3207, Australia

C/Orense, 4, planta 13, 28020 Madrid, Spain

Lower Ground Floor, Nautica Building, The Water Club, Beach Road, Granger Bay, 8005 Cape Town, South Africa

Figures

Figures should be numbered consecutively as they appear in the text. Any indication of features of special interest should also be included. Figures must be supplied electronically. They must be saved at final publication size and ideally supplied in the following file formats: halftone figures (black & white, and colour) as TIF files at 300 dpi; black & white line figures as TIF or EPS files at 1000 – 1200 dpi. PDF format is also accepted. When relevant, photographs should be submitted with proposed reduction or magnification indicated by a scale line on or beside, the illustration.

The places for insertion into the text should be indicated in the text as 'Fig. 1' etc. Legends for all illustrations should be typed together, separately from the main text.

More detailed information is available at:
<http://journals.cambridge.org/artworkguide>

Tables

Tables with concise headings should be placed at the end of the paper. Each table must have a text reference, in the form 'Table 1' etc.

References

References should be cited in the text as Conklin (1905) showed or as shown (Conklin, 1905). For papers with three or more authors use et al. A full list of references in alphabetical order should be given at the end of the text: surname of author and initials; year of publication (in parentheses); title of paper; journal or book name (the former being abbreviated in accordance with the World List of Scientific Periodicals); volume number; first and last page of the reference. For books and conference proceedings, place of publication and publisher (and editor(s) if appropriate) should be included.

Proofs

Proofs will be sent to the author for checking. Typographical or factual errors only may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Offprints

A PDF offprint of each article will be supplied free to each first named author.

ZYGOTE

The Biology of Gametes and Early Embryos

CONTENTS

ORIGINAL ARTICLES

Effects of gaseous atmosphere and antioxidants on the development and cryotolerance of bovine embryos at different periods of *in vitro* culture

Rocha-Frigoni, N. A. de S., Leão, B. C. da S., Nogueira, É., Accorsi, M. F. & Mingoti, G. Z. 159

Vitrification of day 3 cleavage-stage embryos yields better clinical outcome in comparison with vitrification of day 2 cleavage-stage embryos

Chi, F., Luo, C., Yin, P., Hong, L., Ruan, J., Huang, M., Duan, T. & Tong, G. 169

Gamete quality in fish: evaluation parameters and determining factors

Valdebenito, I. I., Gallegos, P. C. & Effer, B. R. 177

Comparative expression analysis of embryonic development-related genes at different stages of parthenogenetic and *in vitro* fertilized embryos in caprine

Singh, R., Kumar, K., Ranjan, R., Kumar, M., Yasotha, T., Singh, R. K., Das, B. C., Sarkar, M. & Bag, S. 198

Expression of *INHβA* and *INHβB* proteins in porcine oocytes cultured *in vitro* is dependent on the follicle size

Kempisty, B., Piotrowska, H., Rybska, M., Wózna, M., Antosik, P., Bukowska, D., Zawierucha, P., Ciesiółka, S., Jaśkowski, J. M., Nowicki, M., Brüßow, K.-P. & Zabel, M. 205

Gamete quality of streaked prochilod *Prochilodus lineatus* (Characiformes) after GnRH_a and dopamine antagonist treatment

Viveiros, A. T. M., Gonçalves, A. C. S., Chiacchio, I. M. D., Nascimento, A. F., Romagosa, E. & Leal, M. C. 212

Involvement of L(-)-rhamnose in sea urchin gastrulation: a live embryo assay

Smith, T. N. & Oppenheimer, S. B. 222

S100A7 in the Fallopian tube: a comparative study

Teijeiro, J. M. & Marini, P. E. 229

Induced reproduction and early development histology of Oscar *Astronotus ocellatus* (Agassiz, 1831)

Paes, M. do C. F., Makino, L. C., Vasquez, L. A., Fernandes, J. B. K., Valentin, F. N. & Nakaghi, L. S. O. 237

Early development of *Betta splendens* under stereomicroscopy and scanning electron microscopy

Valentin, F. N., Nascimento, N. F. do, da Silva, R. C., Fernandes, J. B. K., Giannecchini, L. G. & Nakaghi, L. S. O. 247

Expression of phosphatidylcholine biosynthetic enzymes during early embryogenesis in the amphibian *Bufo arenarum*

Fernández-Bussy, R., Mouguelar, V., Banchio, C. & Coux, G. 257

Morphological changes and germ layer formation in the porcine embryos from days 7–13 of development

Sun, R., Lei, L., Liu, S., Xue, B., Wang, J., Wang, J., Shen, J., Duan, L., Shen, X., Cong, Y., Gu, Y., Hu, K., Jin, L. & Liu, Z.-h. 266

Developmental potential and kinetics of pig embryos with different cytoplasmic volume

Li, J., Li, R., Villemoes, K., Liu, Y., Purup, S. & Callesen, H. 277

Oviductal and endometrial mRNA expression of implantation candidate biomarkers during early pregnancy in rabbit

Saeed, A. M., Juano, M. de I. D. S. de, Jiménez, F. M. & Vicente, J. S. 288

Effects of sorbitol on porcine oocyte maturation and embryo development *in vitro*

Lin, T., Zhang, J. Y., Diao, Y. F., Kang, J. W. & Jin, D.-II 297

SHORT COMMUNICATION

Expression pattern of *STAT5A* gene during early bovine embryogenesis

Flisikowski, K., Boulhaeve, M., Lopes, F. P., Wolf, E. & Zwierzchowski, L. 307

COMMENTARY

Comment on G. Herranz: The timing of monozygotic twinning: a criticism of the common model. *Zygote* (2013)

Denker, H.-W. 312
