Battling for American Labor

Wobblies, Craft Workers, and the Making of the Union Movement
HOWARD KIMELDORF

"This riveting, nuanced book takes seriously the workplace radicalism of many early 20th century American workers. The restriction of working class militancy to the workplace, it shows, was no mere economism."

Big Business and the Wealth of Nations

Alfred D. Chandler, Jr., Franco Amatori, and Takashi Hikino, Editors

Written in nontechnical terms, this book explains how the dynamics of big business have influenced national and international economies. It is the first systematic treatment of big business in advanced, emerging, and centrally-planned economies from the late nineteenth century, when big businesses first appeared, to the present.

Paths Toward Democracy

The Working Class and Elites in Western Europe and South America

Ruth Berins Collier

The question of whether democratization is an elite-led process from above or a popular triumph from below continues to be an area of contention among political scientists. Examining the experiences of countries that have provided the main empirical base for recent theorizing, namely, Western Europe and South America, this book delineates a more complex and varied set of patterns. The volume explores democratization through a comparative analysis that examines the role of labor in relation to elite strategies in both contemporary and historical perspectives.

The Sanctions Paradox

Economic Statecraft and International Relations

Daniel W. Drezner

"The *Sanctions Paradox* is one of the best books written in the field of international political economy during the 1990s. It offers a simple but clever theory that explains when states are likely to employ economic sanctions and when they are likely to work. Since sanctions seem destined to remain a favorite tool of statecraft in the 21st century, this book is likely to be paid serious attention for years to come."

Interest Groups, Lobbying, and Participation in America

Kenneth M. Goldstein

More than individual attributes and attitudes motivate individuals to participate in politics and more goes into interest group influence than financial donations and direct activity. To answer fundamental questions about what determines when and why people participate in politics and how organized interests go about trying to influence legislative decision-making, we must understand how and why political leaders recruit which members of the public into the political arena. Looking from the bottom up with survey data and from the top down with data from interest group interviews, Goldstein develops and tests a theory of how tactical choices in a grass roots campaign are made.

International Toxic Risk Management Ideals, Interests and Implementation

Aynsley Kellow

This original and sometimes controversial book is concerned with international regulation, negotiation and policy-making in the environmental realm. In particular, it focuses on toxic chemicals, and the ways in which risk associated with hazardous substances is assessed, and the policy outcomes that result. A key assertion of the book is that the international arena is more favorable to environment groups while the domestic arena tends to favor industry. The book is based on research into international agencies and takes a multidisciplinary approach.

A Unified Theory of Voting

Directional and Proximity Spatial Models

Samuel Merrill III and Bernard Grofman

Professors Merrill and Grofman develop a unified model that incorporates voter motivations and assesses its empirical predictions—for both voter choice and candidate strategy—in the United States, Norway, and France. The analyses show that a combination of proximity, direction, discounting, and party ID are compatible with the mildly but not extremely divergent policies that are characteristic of many two-party and multiparty electorates. All of these motivations are necessary to understand the linkage between candidate issue positions and voter preferences.

Contemporary Political Theory

Democracy's flexibility, its commitment to equality of representation, and its recognition of the legitimacy of opposition are all positive features of political institutions. But democracy is in many respects less than equal to the demands it confronts. In this series some of the world's most prominent political theorists and social scientists present original discussions of these urgent issues.

FOR YOUR AMERICAN GOVERNMENT COURSES

American Government

Christopher Bosso
Northeastern University

John Portz
Northeastern University

Michael Tolley
Northeastern University

Woven through this text is the unifying theme that American politics represents "conflict and compromise," in direct opposition to the increasingly commonly held view that all politics are dirty and all politicians are crooks. By presenting a balance of essential factual content with a broad assessment of system dynamics and their policy effects, the authors provide an accessible yet sophisticated overview of American politics.

American Government aims to show students that conflict is natural in human society and that "politics" ultimately is about how people try to transform their conflicts into mutually acceptable compromises. By examining the societal contexts that shape American politics—the size of the nation, diversity of population, technological advances, social and economic change—the book will help students understand the core values that define the American political culture and how these values affect the ways in which Americans view the world.

Features:

- Concise 12 chapter format.
- Coherent theme of "conflict versus compromise" in the American political system.
- Consistent examination of US history for institutional development.
- Emphasis on the role of citizenship in good government.

Essentials of American Politics

David McKay
University of Essex, United Kingdom; visiting professor,
University of California, Santa Barbara

Essentials of American Politics is an undergraduate text with a novel analytical and comparative focus. It takes as a central theme the increasing tension in American politics between a general philosophy of limited government and particular public demands for more and better government programs and services. While this has always been a feature of the American polity, recent events have brought it into sharp focus. Both a Republican Congress and Democratic president extol the virtues of less government but continue to grapple with demands for improved education, health care, transportation and almost every other area of social and economic life. All praise the virtues of lower taxation and at the same time promise improvements in the quality of public services. A similar tension applies in the courts, in state politics and indeed throughout the system. Recent successes such as a balanced budget have been achieved in part because the limited government philosophy has been on the ascendant and has won support from all shades of political opinion. But conflicts over the distributional questions of who gets what has hardly subsided.

In few other democracies is this tension as well defined as in the United States and *Essentials* reminds readers of this fact through comparison with democratic processes in other countries, and in particular with European countries.

Essentials weaves this theme into a discussion of American national politics. Up to date and well organized chapters are devoted to beliefs and values, the Constitution, federalism, Congress, presidency, the federal bureaucracy, interest groups and the courts. Policy chapters include economic, social and foreign affairs. In all chapters the analytical approach explains to students some of the main controversies in American political science. At all times *Essentials* seeks to impart basic information on American politics in an analytical but stimulating manner.

Features:

- Concise format of 17 chapters that cover institutions, behavior and policy arenas.
- Theme of American's general philosophy of limited government versus our particular demands for expanded government programs and services.
- Rich, comparative examples (Britain, Canada, and Mexico versus U.S.) throughout the book's narrative.

Days of Defeat and Victory

Yegor Gaidar

Translated by Jane Ann Miller

Foreword by Michael McFaul

"Must reading for all who wish to understand what is happening in Russia today. But it is more than merely informative; it is a good read, a fast-paced narrative, at times exciting and at times deeply moving."

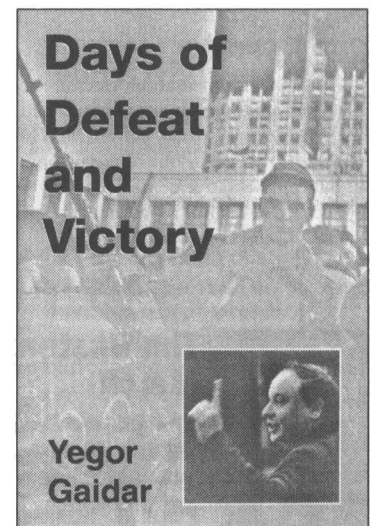

—Jack F. Matlock, Jr., former U.S. ambassador to the Soviet Union

Yegor Gaidar, the first post-Soviet prime minister of Russia and one of the principal architects of its historic transformation to a market economy, here presents his lively account of governing in the tumultuous early 1990s. Gaidar's youthfulness, energy, and daring are symbolic of a new phenomenon in Russian politics—the emergence of a younger generation of politicians with a distinctly technocratic bent, looking firmly to the U.S. and Europe for inspiration and sharing little of the old generation's nostalgia for Communist stability.

Gaidar remains active in Russian politics, having formed his own political party, Russia's Democratic Choice. In this book he brings his story through Yeltsin's cliffhanger re-election in 1996, and assesses the still precarious state of the market reforms and democratic politics.

Foreword by

S. Frederick Starr

Central Asia is a crossroads of great cultures and civilizations. In 1991 five nations at the heart of the region—Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan—suddenly became independent. Long-suppressed ethnic identities are finding new expression in language, religion, and occasional civil conflicts. This pathbreaking collection of essays illuminates the social and institutional forces shaping this important region's future.

Sovereignty

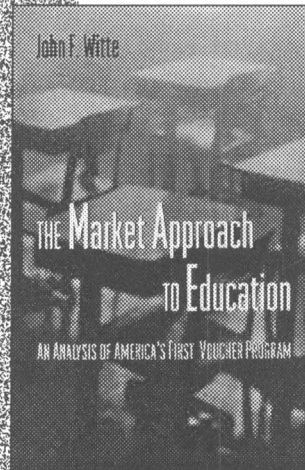

Organized Hypocrisy

Stephen D. Krasner

The acceptance of human rights and minority rights, the increasing role of international financial institutions, and globalization have led many observers to question the continued viability of the sovereign state. Here a leading expert challenges this conclusion.

"Krasner's book will spark much debate and become required reading for all those who wish to think seriously about the nature of sovereignty today."—Hendrik Spruyt, Columbia University

The Market Approach to Education

An Analysis of America's First Voucher Program

John F. Witte

In 1990, Milwaukee, one of the nation's most segregated metropolitan areas, implemented a school choice program aimed at improving the education of inner-city children by enabling them to attend private schools. The results of this experiment have been overshadowed by the emotional debate it provoked nationwide. In this book, John Witte provides a detailed framework for understanding the Milwaukee experiment and its implications for the market approach to American education.

Capitalism, Democracy, and Ralph's Pretty Good Grocery

John Mueller

Democracy is overrated. Capitalism doesn't get enough credit. John Mueller argues that these mismatches between image and reality create significant political and economic problems. We should recognize that neither system is ideal or disastrous and accept that both are "pretty good." And, to Mueller, that means good enough.

"Many thought-provoking ideas are packed into this nuanced work, and Mueller's case is strong and well-documented."—*Library Journal*

Must Global Politics Constrain Democracy?

Great-Power Realism, Democratic Peace, and Democratic Internationalism

Alan Gilbert

As each power vies for its national interests on the world stage, how do its own citizens' democratic interests fare at home? Alan Gilbert speaks to an issue at the heart of current international-relations debate. He contends that a vocal citizen democracy can and must have a role in global politics. Gilbert's theory of "deliberative democracy" proposes institutional changes that would give the voice of ordinary citizens a greater influence on the international actions of their own government.

John Stuart Mill on Liberty and Control

Joseph Hamburger

By examining Mill's arguments in *On Liberty* in light of his other writings, Joseph Hamburger reveals a Mill very different from the "saint of rationalism." He shows that Mill, far from being an advocate of a maximum degree of liberty, was an advocate of liberty and control—a degree of control ultimately incompatible with liberal ideals.

This clearly written and forcefully argued book is a major reinterpretation of Mill's ideas and intellectual legacy.

Politics, Philosophy, Terror

Essays on the Thought of Hannah Arendt

Dana R. Villa

As Dana Villa shows, Hannah Arendt's thought is often poorly understood, both because of its complexity and because her fame has made it easy for critics to write about what she is reputed to have said rather than what she actually wrote. Villa sets out to change that here, explaining clearly Arendt's major contributions to our understanding of politics, modernity, and the nature of political evil in our century.

In Defense of a Political Court

In Defense of a Political Court

Terri Jennings Peretti

Can the Supreme Court be free of politics? Do we want it to be? Normative constitutional theory has long concerned itself with the legitimate scope and limits of judicial review. Too often, theorists seek to resolve that issue by eliminating politics from constitutional decision-making. In contrast, Terri Peretti argues for an openly political role for the Supreme Court.

In Defense of a Political Court bridges the gap between normative constitutional theorists and political scientists who study the courts.

Business and the Politics of Human Capital Investment Policy

Cathie Jo Martin

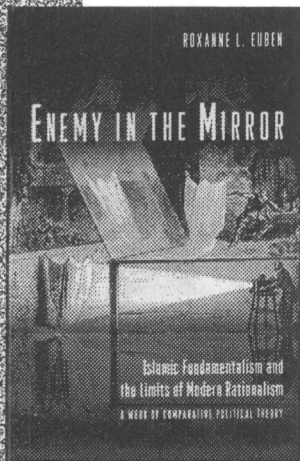

According to conventional wisdom, big business wields enormous influence over America's political agenda and is responsible for the limited scale of the country's social policies. Cathie Jo Martin challenges that view, arguing that big business has limited involvement in defining social policy.

Combining hundreds of interviews with careful quantitative analysis, Martin has crafted a vivid portrayal of the interplay between business and politics.

Enemy in the Mirror

Islamic Fundamentalism and the Limits of Modern Rationalism
A Work of Comparative Political Theory

Roxanne L. Euben

A firm grasp of Islamic fundamentalism has often eluded Western political observers. Roxanne Euben makes new sense of this belief system by revealing it as a critique of and rebuttal to rationalist discourse and post-Enlightenment political theories. Here Euben situates Islamic fundamentalist thought within a transcultural theoretical context.

WHO COUNTS? The Politics of Census-Taking in Contemporary America

MARGO J. ANDERSON AND STEPHEN E. FIENBERG

Who Counts? is the story of the lawsuits, congressional hearings, and bureaucratic intrigues surrounding the 1990 census and their implications for future censuses. These controversies formed largely around a single vexing question: should the method of conducting the census be modified in order to rectify the demonstrated undercount of poor urban minorities?

This volume reveals in extraordinary detail the interplay of law, politics, and science that propel the ongoing census debate, a debate whose outcome will have tremendous impact on the distribution of political power and economic resources among the nation's communities.

THE ENVIRONMENTAL PRESIDENCY

Dennis L. Soden, editor

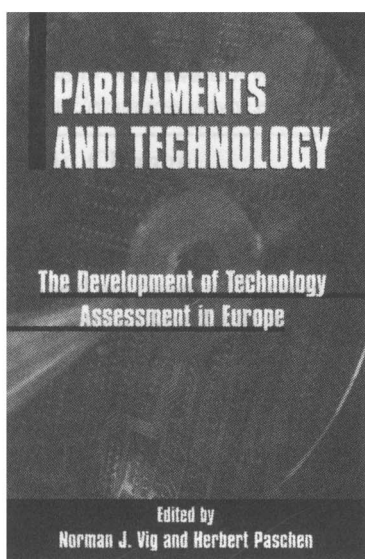

The Environmental Presidency develops a systematic understanding of how presidents have influenced the development of environmental and natural resource policy through an examination of environmental behavior and interaction patterns between the president and the American people. Looking at five presidential roles—Commander in Chief, Chief Diplomat, Opinion and Party Leader, Chief Legislator, and Chief Executive—the authors show how the modern presidency has redefined the relative strengths of each role in response to the political salience of the environment.

“This book is NEEDED for environmental politics courses, and for presidency courses as well. There is nothing even remotely like this book available, and it tells a thorough story about the development of U.S. environmental policy and the evolution of the presidency that is both interesting and well done.”

PARLIAMENTS AND TECHNOLOGY

The Development of Technology Assessment in Europe

Norman J. Vig and Herbert Paschen, editors

Parliaments and Technology explores an issue critically important to the practice of democracy everywhere: How do citizens and elected officials assess the opportunities and costs of new technologies that may profoundly impact their societies' future? For example, what are the social and moral implications of gene patents, reproductive technology, cloning and genetic engineering or of virtually unlimited access to information? Technology assessment has become one of the most important methodologies for aiding legislatures in analyzing and deliberating such questions.

The first comparative analysis of the development and practice of parliamentary technology assessment in different national settings, this book explains the origins, methods, and impacts in five European countries—Britain, France, Germany, Denmark, and the Netherlands—and the European Parliament. It also provides a theoretical framework for comparing the institutionalization of new functions in different parliamentary systems and the influence of national political cultures on the conceptualization and operation of these new agencies.

Political Parties and Constitutional Government

Remaking American Democracy

Sidney M. Milkis

Sidney Milkis explores the uneasy relationship between the Constitution and the party system to advance a novel argument:

political parties arose as part of a deliberate program of constitutional reform.

With the decline of localized parties, there has arisen an administrative politics of rights and entitlements that belittles the efforts of Democrats and Republicans alike to define a collective purpose. Ending with a discussion of possible methods of revitalization and reform, this timely book does much to explain the reasons behind Americans' disenchantment with parties and the party system.

William Ascher

William Ascher discovers the complex political and programmatic reasons why government officials in Third World countries often willfully adopt wasteful natural resource policies.

Drawing on case studies from Africa, Asia, and Latin America, Ascher goes beyond the trite answers of greed and incompetence to document how clashes among government agencies have led to results ranging from Indonesia's deforestation to the collapse of the Mexican water system, from the destruction of cocoa farms in Ghana to the waste of Nigeria's oil wealth.

Democratization in Africa

edited by Larry Diamond and Marc F. Plattner

The past decade's "third wave" of democratization, the contributors argue, has been characterized by retreats as well as advances. In some cases, newly established democratic orders have devolved into pseudo-democracies while, in other cases, superficial changes have been used as a cosmetic screen for continuation of often brutal regimes. The volume makes clear, however, that political liberalization is making significant headway in Africa.

Hong Kong's Embattled Democracy

A Societal Analysis

Alvin Y. So

By analyzing the shifting interests and alliances of the populace, political sociologist Alvin So explains why democracy in Hong Kong under Beijing's rule resembles the limited democracy of the Hong Kong of the 1980s. So highlights the crucial role played by Hong Kong's business-entrepreneurial class, which rose in power and influence, developed an alliance with the Chinese government, and slowed down democratization before the handover.

RETURN TO DIVERSITY

A Political History of East Central Europe Since World War II

Third Edition

Joseph Rothschild, *Columbia University*, and Nancy M. Wingfield, *Northern Illinois University*

"By far the most reliable and incisive analysis of the rise and fall of the Communist bloc in Eastern Europe. My students found it immensely helpful."

—Warren Lerner, *Duke University* (on the previous edition)

This highly acclaimed book offers a complete political history of East Central Europe from World War II to the present. Now in its third edition, this book introduces a new co-author, Nancy M. Wingfield, and has been fully updated to cover events up through the 1990s. It is unsurpassed in scope, in depth of analysis, and in fairness and objectivity.

Hostile Environment

The Political Betrayal of Sexually Harassed Women

GWENDOLYN MINK

According to Judge Susan Webber Wright, President Clinton's alleged behavior toward Paula Jones, even if "boorish and offensive," did not constitute sexual harassment because he had taken "no" for an answer. In a passionate defense of the rights of sexually harassed women, Gwendolyn Mink warns that Judge Wright and the president's supporters have undermined our sexual harassment laws. *Hostile Environment* is her provocative account of the harm being done to these laws and her warning that the laws themselves are worthless if, as in the current political climate, few women dare to use them. \$21.95

The Politics of the Asian Economic Crisis

EDITED BY
T. J. PEMPEL

A group of experts here presents the first account to focus on the political causes and implications of the Asian Economic Crisis. The events of 1997–98 involved not just property values, financial flows, portfolio makeup, and debt ratios, they argue, but also the power relationships that shaped those economic indicators. The authors analyze why the crisis affected the nations of Asia in different ways, and consider whether the crisis indicates a radical change in Asia's economic future. The Journal of Policy Reform

http://www.gbhap.com/Policy_Reform/

Editors: Arvind Panagariya, University of Maryland, USA and
Dani Rodrik, John F. Kennedy School of Government, Harvard University, Cambridge, USA

This journal focuses on a new, dynamic area of research which has emerged during the last decade: Policy Reform.

Among questions being addressed are: What is the appropriate sequencing of reforms in the absence of market institutions? How can macroeconomic stability be achieved when tax instruments are inadequate and demands for spending on social safety nets strong? What are the appropriate strategies for building political support for reforms? Answers to these and other related questions are being sought through analytic country studies, econometric empirical applied theoretical work.

GLOBAL JUSTICE

Defending Cosmopolitanism
CHARLES JONES

What obligations do wealthy people have to ensure that the world's poor achieve a quality of life that is recognizably human? This is the fundamental question of international distributive justice which has only been seriously debated in the last 25 years. This book analyzes the relative merits of the core moral perspectives framing the debate, including universalism, nationalism, patriotism, and relativism.

APSA's CAREER VIDEO PREMIERES IN 2000

ARE THESE THE MESSAGES YOU WANT STUDENTS TO HEAR ABOUT THE STUDY OF POLITICAL SCIENCE?

"First class training in political science, that's been the basis of my career, and all the experiences have simply added and reinforced and strengthened that training"

Donna Shalala, Secretary, Department of Health and Human Services

"...The importance of academic study and [its] relationship between the world of the mind and the world of action."

Anita Isaacs, Professor, Haverford College

"You are going to major in something in college that you're going to like, that interests you, that helps you address where you stand with the world and how to relate to it."

Francisco Rodrigues, Lawyer

"Political Science... has the analytical background but it was also more creative and more thought-provoking."

Kate Coyer, Rock the Vote

"Back in my hometown of Knoxville, Tennessee...it was the civil rights era. I can remember my civics teacher telling us how important it was to understand how this nation operated, understand how laws were made, how laws were influenced."

**Reggie Felton, President, Montgomery County School Board
Lobbyist, National School Boards Association**

"If you love the subject study it, because you'll be richer for the experience and you won't have a problem getting a job if you work hard at whatever you do."

Cindy Hall, Market Researcher

"I became a political science major, I think, for a very common reason, and that is I really loved politics."

Bill Koetzle, Legislative Director, Congressman Dennis Hastert (R.-IL)

"I'm amazed at how all of the skills that I have accumulated and in particular the skills from my public policy background come into play ever day in what I do..."

Kate Maehr, Chief Fundraiser, Greater Chicago Food Depository

"Political Science....develops the skills to be a good citizen, to defend what you stand for."

Dave Richmond, Government Teacher, Bakersfield, California

"Political Science really helps newspeople look at the big picture and see how things are playing out in the world."

Charlotte Starke, News Anchor, KGET, Channel 17

IF SO, ORDER CAREER ENCOUNTERS: POLITICAL SCIENCE* FOR YOUR STUDENTS

SNEAK

CAREER ENCOUNTERS: POLITICAL SCIENCE is a 28 ½ minute video produced by the APSA, sponsored by the Departmental Services Program with additional support from the Professional Opportunity Grant Fund allocated by the Committee on Education and Professional Development. The video features 10 people with meaningful and rewarding careers who studied political science in college and whose comments are featured in this advertisement.

Their stories can carry the message about the value of undergraduate study in political science to students in your colleges and universities and to high school students visiting your campus and classes.

CAREER ENCOUNTERS: POLITICAL SCIENCE is designed to be shown in class, at meetings for prospective majors and at recruiting and career fairs. This video is accompanied by brief instructions that illustrate how to use the program in segments as well as in its entirety. It has been produced specifically as a resource for political science departments and faculty who face questions from students and their parents about the skills and opportunities associated with the study of political science

Order now to be assured of delivery in February 2000. Because the video production is subsidized in part by Departmental Services Program (DSP) dues, DSP members may purchase the video at a special discount of \$25 per video or purchase a video with a 3-year license to duplicate the video for campus use for \$75. The cost to non DSP members is \$50 per video and \$150 per video with a 3-year license to duplicate the video for campus use. There is a \$5 shipping and handling fee per video on all orders. *Your department still has time to become a Departmental Services Program member and pay a much lower price for the video.*

TO ORDER: Simply call APSA Publications at 202-483-2512 or order online at <http://www.apsanet.org/pubs>

Privatization and Public-Private Partnerships

E. S. SAVAS

"[This book] cements Savas's position as one of the nation's most lively students of privatization. He not only makes the case about what privatization is and where it's most likely to work, but also about the new strategies that have developed over the past decade."

Power Transitions

Strategies for the 21st Century

RONALD TAMMEN, JACEK KUGLER,

DOUGLAS LEMKE, ALLAN C. STAM III, ET AL.

"This book eloquently sets out the case for the power transition perspective and does so in a highly readable fashion. What is more, it is focused in such a way that it will appeal both to scholars and policymakers. Unlike any previous power transition work, it is rich with ideas about how the insights from this theory might apply to the fundamental foreign policy issues likely to dominate the next century."

—Bruce Bueno de Mesquita, Stanford University
