

Instructions to authors

Detailed instructions to authors are available online here:
cambridge.org/core/journals/journal-of-glaciology/information

The *Journal of Glaciology* publishes three types of paper:

- Articles - concerning new findings and theories, or new instruments and methods, in glaciology; or review articles that offer an up-to-date, coherent account of a glaciological subject that is developing rapidly or has been neglected
- Letters - identical in form and general content to Articles, but of reduced length, and carrying substantially reduced processing charges
- Communications - short pieces without abstracts that could be, e.g., comments on published articles/letters, book reviews, or short correspondence on topics of interest to the community

Papers submitted should be:

- of high scientific quality
- complete and clear
- substantially different from previously published work.

Length

Papers should be concise. Lines and pages should be numbered. Papers more than 12 *Journal* pages in length should be cleared with the Chief Editor before submission (one *Journal* page = about 1000 words). Letters are limited to five *Journal* pages.

Original submission

Submit your paper via the *Journal of Glaciology* online submission system at <https://mc.manuscriptcentral.com/jog>

Review process

Your paper will be peer reviewed by at least two reviewers. The Scientific Editor will discuss any alterations required to the paper. The Associate Chief Editor will inform you if and when your paper is accepted for publication. Papers written in poor English will be rejected without review.

You will be sent a proof of your text and illustrations to check and correct (you will have to pay for any substantial alterations made at this stage).

Final submission

The final accepted version of the paper should be in electronic format.

- Acceptable formats are
 - Text (including tables and figure captions) – Word, rtf or LaTeX (the IGS class file should be used; downloadable from the website). Please also supply a final PDF
 - Figures – ideally in tif or eps format (or otherwise in the format in which they were created)
- Responsibility for the accuracy of all data (including references) rests with the authors

Supplementary material

The *Journal of Glaciology* accepts and makes available online appropriate supplementary material. It should be clearly named and labelled and provided in standard file formats.

General points

- Title should be concise

- Abstract should be less than 200 words
- Papers should be divided into numbered sections with short section headings
- Use SI units
- Use internationally recognized systems of abbreviation
- Illustrations should
 - be one or two column widths: up to 85 mm or up to 178 mm
 - not be in boxes
 - use strong black lines (avoid tinting if possible)
 - use SI units in labels
 - use Optima, Arial or a similar sans serif font in labels
- TeX authors: please provide a pdf of the whole paper (text, tables, figures and captions) as well as the individual LaTeX and graphics files
- Equations should
 - be set in MathType or advanced equation editor
 - NOT be embedded as graphics in the text
- Tables should
 - be numbered in Arabic
 - be referred to in text (as Table 1 etc.)
 - NOT be submitted as illustrations
- All citations in text should include the author name(s) and the year of publication (e.g. Smith, 2010; Smith and Jones, 2012; Smith and others, 2014) and must have an entry in the reference list
- Reference lists should
 - be concise
 - be complete and accurate, including doi numbers
 - be provided in precise *Journal* format, including punctuation and emphasis (see past papers for style)
 - be arranged in alphabetical order by first author's surname
 - include works accepted but not published as 'in press'
 - not include personal communications, unpublished data or manuscripts in preparation or submitted for publication (these should be included in the text)

Open Access and page charges

As a gold open access journal, the *Journal of Glaciology* is published without restriction and receives no subscription revenue. The costs of publication are instead covered by an article publishing charge (APC) levied upon the corresponding author, or his/her funding body or institution.

The APC for non-IGS members is £1,320 for a regular article (of 6 published pages or more), £660 for a letter (of 5 published pages or fewer) and communications (of 2 published pages or fewer).

The APC for IGS members is £1,188 for a regular article, £594 for a letter and £270 for a communication. The APCs quoted here are correct for 2019.

Upon acceptance for publication the corresponding author will be contacted by Rightslink on behalf of Cambridge University Press, who will administer the collection of the article publishing charge. At that stage the corresponding author can pay by credit card or arrange for an invoice to be issued to his/her funding body or institution. Selected authors may be granted an APC waiver by the IGS. In such cases, a waiver code shall be provided, which should be issued to Rightslink upon receipt of the payment.

Journal of GLACIOLOGY

CONTENTS Vol 65 No 249 2019

1–12 **Glacier surges in the north-west West Kunlun Shan inferred from 1972 to 2017 Landsat imagery**
Thomas R. Chudley, Ian C. Willis

13–28 **Glacier changes between 1971 and 2016 in the Jankar Chhu Watershed, Lahaul Himalaya, India**
Suresh Das, Milap Chand Sharma

29–38 **Culturable bacteria isolated from seven high-altitude ice cores on the Tibetan Plateau**
Yongqin Liu, John C. Prisco, Tandong Yao, Trista J. Vick-Majors, Alexander B. Michaud, Liang Sheng

39–54 **Non-linear glacier response to calving events, Jakobshavn Isbræ, Greenland**
Ryan Cassotto, Mark Fahnestock, Jason M. Amundson, Martin Truffer, Margaret S. Boettcher, Santiago de la Peña, Ian Howat

55–67 **Comparing measurements of snow mechanical properties relevant for slab avalanche release**
Benjamin Reuter, Martin Proksch, Henning Lowe, Alec van Herwijnen, Jürg Schweizer

68–84 **Evidence that abrasion can govern snow kinetic friction**
James H. Lever, Susan Taylor, Garrett R. Hoch, Charles Daghljan

85–100 **Ground-based remote-sensing techniques for diagnosis of the current state and recent evolution of the Monte Perdido Glacier, Spanish Pyrenees**
J. I. López-Moreno, E. Alonso-González, O. Monserrat, L. M. Del Río, J. Otero, J. Lapazaran, G. Luzi, N. Dematteis, A. Serreta, I. Rico, E. Serrano-Cañadas, M. Bartolomé, A. Moreno, S. Buisan, J. Revuelto

101–122 **The influence of strain rate and presence of dispersed second phases on the deformation behaviour of polycrystalline D₂O ice**
Christopher J.L. Wilson, Nicholas J. R. Hunter, Vladimir Luzin, Mark Peternell, Sandra Piazzolo

123–135 **Glacier bed surveying with helicopter-borne dual-polarization ground-penetrating radar**
Lisbeth Langhammer, Lasse Rabenstein, Lino Schmid, Andreas Bauder, Melchior Grab, Philipp Schaer, Hansruedi Maurer

136–148 **Closing the mass budget of a tidewater glacier: the example of Kronebreen, Svalbard**
Cesar Deschamps-Berger, Christopher Nuth, Ward van Pelt, Etienne Berthier, Jack Kohler, Bas Altena

149–156 **Air reverse circulation at the hole bottom in ice-core drilling**
Zhengyi Hu, Pavel Talalay, Zhichuan Zheng, Pinlu Cao, Guitao Shi, Yuansheng Li, Xiaopeng Fan, Hongmei Ma

157–167 **Probabilistic size effect law for mode II fracture from critical lengths in snow slab avalanche weak layers**
D. M. McClung, C. P. Borstad

Letter

168–172 **Characterizing the surge behavior of Alakesayi Glacier in the West Kunlun Shan, Northwestern Tibetan Plateau, from remote-sensing data between 2013 and 2018**
Xiyu Fu, Zhen Li, Jianmin Zhou

Published for the International Glaciological Society, Cambridge, UK
