

JOURNAL OF K-THEORY

Instructions for Contributors

Submission of Manuscripts

Authors planning to submit papers are asked to prepare, if possible, their manuscript using LaTeX or AMS-LaTeX. Manuscripts should be submitted as a PDF attachment to an e-mail sent to any editor, or to the Managing Editor, Professor A. Bak (bak@math.uni-bielefeld.de). If your article is accepted, you will be asked to supply the LaTeX source code including the graphics, any author defined macros and all style files.

Layout of Manuscripts

Manuscripts should have a short abstract, followed by an introduction which includes references to important related work found elsewhere. The remainder of the paper should be divided into sections, each having a title. Accepted papers should have key words and Mathematics Subject Classification (2010) codes placed immediately after the abstract.

Manuscripts may be prepared in English, French, or German. English is the preferred language.

Proofs

The corresponding author receives one set of proofs for correction. If excessive alterations to the original manuscript are requested after the paper has been typeset, the authors will be charged for the cost of resetting.

Online Posting Rights

Authors will receive a definitive PDF file of their contribution as published at Cambridge Journals Online. They may post it on their personal or departmental web page, provided that the posting includes a prominent statement of the full biographical details, a copyright notice in the name of the copyright holder, Independent Scholarly Online & Print Publishing (ISOPP), and a link to the online edition of the journal at Cambridge Journals Online.

Journal of K -Theory

Volume 11 Issue 3

Contents

The Legacy of Daniel Quillen <i>Anthony Bak, Jonathan Rosenberg and Charles Weibel</i>	465
Quillen model categories <i>Mark Hovey</i>	469
Daniel Quillen, the father of abstract homotopy theory <i>Jean-Claude Thomas and Micheline Vigué-Poirrier</i>	479
Quillen's work on formal group laws and complex cobordism theory <i>Douglas C. Ravenel</i>	493
Spectrum of group cohomology and support varieties <i>Eric M. Friedlander</i>	507
Quillen's work on the Adams Conjecture <i>W. G. Dwyer</i>	517
Quillen's work in algebraic K-theory <i>Daniel R. Grayson</i>	527
Quillen's solution of Serre's Problem <i>Andrei Suslin</i>	549
Algebraic K-theory and cyclic homology <i>Jean-Louis Loday</i>	553
Quillen's work on the foundations of cyclic cohomology <i>Joachim Cuntz</i>	559
Cyclic cohomology after the excision theorem of Cuntz and Quillen <i>Jacek Brodzki</i>	575

Cover design and colour scheme by A. Bak
