## **ERRATA**

The following is a correction for an error that occurred in the *Journal of the International Neuropsychological Society, Vol.* 6, *No.* 3. The error occurred in the article titled "Personality change disorder in children and adolescents following traumatic brain injury," pp. 279–289, by Max et al. On page 285, under the subheading "Injury Factors," beginning with the second sentence in the first paragraph, the statement should read:

Visual inspection of the distribution of PC relative to lowest post-resuscitation GCS scores revealed that a cut-off of lowest post-resuscitation GCS score of 4 or less *versus* more than 4 yielded a sensitivity for a diagnosis of persistent PC of 9/14 (64.3%), specificity of 18/23 (78.3%), and a positive predictive value of 0.64 (9.14).

A cut-off of duration of impaired consciousness of 100 hr or less *versus* more than 100 hr yielded a sensitivity for a diagnosis of persistent PC of 11/14 (78.6%), specificity of 20/23 (87.0%), and a positive predictive value (PPV) of 0.79 (11/14).

The following is a correction for a printing error that occurred in the *Journal of the International Neuropsychological Society, Vol. 5, No. 7.* The error occurred on page 579 where an author's name, Dr. Ronald J. Ellis, was accidently left out of the banner that appears at the beginning of all articles. That entry should have been printed as:

## The impact of HIV-related neuropsychological dysfunction on driving behavior

THOMAS D. MARCOTTE,  $^1$  ROBERT K. HEATON,  $^1$  TANYA WOLFSON,  $^1$  MICHAEL J. TAYLOR,  $^1$  OMAR ALHASSOON,  $^1$  KAIVON ARFAA,  $^1$  RONALD J. ELLIS,  $^2$  IGOR GRANT,  $^{1,3}$  AND THE HNRC GROUP

(RECEIVED July 2, 1998; REVISED February 10, 1999; ACCEPTED February 25, 1999)

Cambridge University Press and the authors deeply regret the inconvenience that these inadvertent errors may have caused.
