

IAU Transactions XXX

Proceedings of the Thirtieth General Assembly Vienna 2018

These Transactions provide a record of the organisational and administrative activities of the IAU XXX General Assembly, which took place in Vienna, Austria, in August 2018. They report and record all of the essential decisions taken by the governing body of the IAU. These include the approval of the financial accounts and of the proposed budget for the next three years, the admission of new national and individual members, the Divisions, Commissions, and Working Groups, the new Officers and Executive Committee, and the approval of Resolutions, as well as opening and closing ceremonies and other events. Focus Meetings are published in the 'Astronomy in Focus' series, and each of the six Symposia that took place has its own Proceedings. The world was forever changed by the COVID-19 pandemic shortly after this General Assembly, contributing to the delay in this volume's publication.

Proceedings of the International Astronomical Union
Editor in Chief: Prof. Maria Teresa Lago

This series contains the proceedings of major scientific meetings held by the International Astronomical Union. Each volume contains a series of articles on a topic of current interest in astronomy, giving a timely overview of research in the field. With contributions by leading scientists, these books are at a level suitable for research astronomers and graduate students.
