**Orders should be sent to the  
American Journal of International Law  
2223 Massachusetts Avenue, N. W., Washington, D. C. 20008**

# Colonial Empire

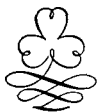

*Seven Subject Sets in the Irish University Press Series  
of the British Parliamentary Papers*

In the nineteenth century, Great Britain's colonial empire extended to all parts of the world—*Africa, Australia, Canada, East India, New Zealand, the West Indies*. Her empire became a powerful economic and cultural force whose impact will be felt for centuries.

The Irish University Press Series of the British Parliamentary Papers provides all social scientists with an enormous source of essential documentation on this colonial period. Seven subject sets have been organized on the English colonies (over 100 volumes) including a vitally important related subject set on *Aborigines* (3 volumes). These volumes contain a wealth of information—dispatches, letters, official proclamations and reports, tables, charts, fold-out maps, documents, and the verbatim witness of government officials, traders, missionaries, colonists and natives—on all the problems and opportunities of colonial life. There is documentation on the establishment of the colonies, detailed and major accounts of native life, native councils, native rebellions, and the massacre of aborigines. A complete analysis of the political, social, and economic life of the colonies is included, detailing information on taxes, boundaries, church affairs, transportation, communications, military administration, legal systems, imports, exports, the abuse of office by public officials, the conservation of natural resources, reports on the major controlling companies, Canadian-American relations, agricultural and manufacturing developments, the discoveries of explorers, the unification of colonies. These volumes present a complete and detailed picture of colonial development from the beginning to the end of the nineteenth century.

The subject sets on *Africa, Australia, Canada, East India, New Zealand, the West Indies* and *Aborigines* are seven of the 75 subject sets in the Irish University Press 1000-volume Series of the British Parliamentary Papers. Each subject set is available to school, public and professional libraries individually or as part of the entire British Parliamentary Papers Series.

Free descriptive catalogs detailing each of the volumes are available. Write today to receive your copies.

# **UN Protection of Civil and Political Rights**

***by John Carey***

The field of human rights in international law and relations was given new impetus with the adoption of the Charter of the United Nations in 1945. Since then, however, much of the progress has been in the direction of clarifying or codifying the substantive law norms governing such rights. Comparatively little has been achieved in the creation of machinery to protect human rights throughout the world.

This is an unusually thorough study of actual practice in the implementation of human rights obligations. Based on extensive research plus the author's own personal observations over the years at the UN, the book concentrates on the practical aspects of existing and proposed techniques for enforcement, each reviewed historically as well as from the perspective of UN practice.

Throughout the book the author maintains a cautious skepticism about the practical value of each enforcement technique, and is candid in suggesting either a more imaginative or a more prudent course for the future in situations where the UN has failed or erred.

**The table of contents indicates the breadth of the study:**

- The UN Examines Its Methods of Protection
- International Legislation to Establish Human Rights
- Education: Long-Range Protection
- Coercing Governments to Respect Basic Rights
- Protection through Non-Criminal Adjudication
- The Problem of Enforcing Judgments Against Governments
- Protection by Criminal Adjudication
- International Negotiation to Rescue Victims
- UN Investigation as a Means of Protection
- The UN's Southern Africa Investigations
- Sources of Information on Violations
- The UN's Double Standard on Treatment of Complaints
- The Protective Power of Publicity
- Aid and Comfort for the Oppressed
- Summary and Conclusion
- Appendixes

## ***The Merchant Shipping Code of the USSR (1968)***

Translated and edited by WILLIAM E. BUTLER and JOHN B. QUIGLEY, JR. The Soviet Merchant Shipping Code covers vessels, ports, crews, pilots, goods and passengers, insurance, salvage—and many other aspects of maritime law. This authoritative translation includes an analysis of the changes in Soviet shipping law over the past forty years, specimen insurance policies and shipping agreements, and a glossary of Russian legal and nautical terms. \$9.00

## ***The Pacific Salmon Fisheries A Study of Irrational Conservation***

JAMES A. CRUTCHFIELD and GIULIO PONTECORVO The important Pacific salmon industry is an example of the problems facing fisheries management in this country. The industry has suffered chronic economic distress partly because its problems have been treated as biological rather than economic. The authors' alternative program of public regulation is based on both biological and economic criteria. \$6.00

## ***Arms Control Agreements Designs for Verification and Organization***

DAVID W. WAINHOUSE *et al.* Seven eminent scholars analyze the structure of international organizations required to verify and administer arms control agreements. The authors present case studies dealing with the control of nuclear arms and general and complete disarmament. In Part II they consider verification problems and general principles, and conclude with a recommendation for the creation of a single verification organization. \$6.95
