The Jupiter Engine is the lightest proved engine of its power in the world. It is the only aero engine which has passed both the British and French official tests. It has also completed an official test of 150 hours at 90% full power, including a 50 hours non-stop run.

Each of the three types of

Bristol

AIRCOOLED AERO ENGINES

400h.p. JUPITER 9 cylinders

100h.p. LUCIFER 3 cylinders

18h.p. CHERUB 2 cylinders

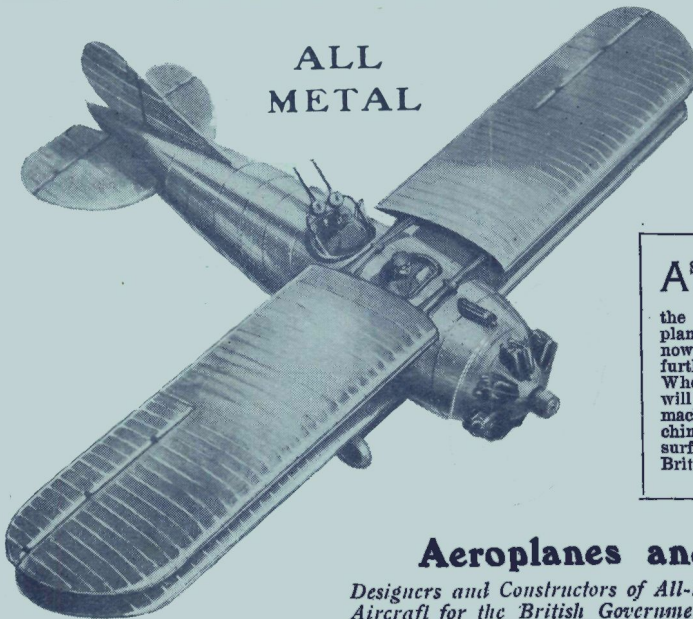

has carried out the Type Tests of the British Air Ministry with success, and has been certified airworthy.

Full details will be forwarded on application to the Designers and Manufacturers:

THE BRISTOL AEROPLANE CO., LTD.,
FILTON, BRISTOL.

ALL
METAL

AS a result of the most exhaustive tests carried out by the R.A.F. Factory on the "Short" All-Metal Aeroplane, Messrs. Short Bros. have now received an order for further machines of this type. When completed these machines will be the only All-Metal machines, that is to say, machines complete with metallic surfaces, to be made in Great Britain.

Aeroplanes and Seaplanes.
