

First rate...the journal to which the most important contributions in the field are submitted. —*Nature*

Since its premiere more than 10 years ago, ***The International Journal of Robotics Research*** has been praised by experts as a long-awaited contribution to the dissemination of serious articles on robotics science.

Under the leadership of its distinguished editorial board, this ground-breaking journal provides the best, most up-to-date information available in robotics and related fields such as artificial intelligence, applied mathematics, computer science, and electrical engineering. Before ***Robotics Research*** was published, scientists had to search through dozens of publications, conference papers, and unpublished reports to find the latest developments in the field.

One Year

Individuals.....	\$ 80.00
Institutions.....	\$ 170.00
Student*/Retired.....	\$ 50.00

*copy of current ID required

*Outside U.S.A., add \$22.00 postage and handling.
Canadians add additional 7% GST. Prepayment
is required. Send check drawn on a U.S. bank
in U.S. funds, MasterCard
or VISA number to:*

The International Journal of

ROBOTICS RESEARCH

Michael Brady, Editor

Published bi-monthly by MIT Press Journals ISSN 0278-2649

NEW!
Adaptive Behavior

Adaptive Behavior, the latest quarterly from MIT Press Journals, will provide the first international forum for experimental and theoretical research on adaptive behavior both in animals and in autonomous artificial systems. Particularly, the journal will feature adaptive behavior mechanisms, organizational principles, and architectures that can be expressed in computational, physical, or mathematical models.

Premiering in summer 1992, **Adaptive Behavior** will be indispensable for scientists, students, and others researching artificial and biological adaptive systems, ethology, genetic algorithms, classifier systems, artificial intelligence, robotics, neural networks, behavioral psychology, and behavioral ecology.

Editor-in-Chief
Jean-Arcady Meyer
CNRS, France

Published quarterly by The MIT Press in summer/fall/winter/spring.
ISSN 1059-7123

Yearly Rates: Individual \$50, Institution \$110, Student/Retired \$35 (copy of student ID required). Outside U.S.A., add \$14 postage and handling. Canadians add additional 7% GST. Prepayment is required. Send check drawn on a U.S. bank in U.S. funds, MasterCard or VISA number to:

Notes for Contributors

1. Manuscripts should preferably be written in English, but papers in French and German will also be accepted. All manuscripts will be referred to acknowledged experts in the subject. Only those receiving favourable recommendations from the referees will be accepted for publication. Manuscripts may be sent to any Board member, any Deputy Editor or the Editor.
2. Typescripts should be double spaced, on one side of good grade paper, allowing a reasonable left-hand margin. An original and two copies should be submitted with the author's full postal address, position and affiliations.
3. A short abstract of about 80 words should precede the main text. *List of symbols*: A typewritten list of any special symbols should be submitted with the manuscript. The list should not define the symbols mathematically, but should serve to identify them typographically. The list will not appear in print, but is essential to help the typesetter and to avoid costly correction in proof.
4. One copy of photographs, prints or transparencies of good quality and unmarked should be submitted. Where lines or lettering are to appear on the photograph, an additional print should be supplied appropriately marked. Each should have, lightly written on the back, the author's name, the figure number and an indication of which is the top of the picture.
5. One copy of each line diagram should be submitted at approximately twice final size and unlettered. Diagrams must be drawn in indian ink on plain white or transparent paper. A second copy should be supplied with lettering included. The author's name and the figure number should be written on this copy. Figures should be numbered consecutively, with arabic numerals, have descriptive captions, and be mentioned in the text. The correct position for each figure should be indicated in the margin of the manuscript.
6. Tables should be typewritten on separate sheets. Avoid, where possible, very wide tables. Number tables consecutively with roman numerals. Each should have a brief heading. Exceptionally lengthy tables may be summarized for publication with a note that copies of details can be obtained from the authors.
7. *Equations*: Wherever possible, mathematical equations should be typewritten, with subscripts and superscripts clearly indicated. The printer will set all mathematical symbols in italics unless otherwise indicated; symbols or letters to be set in roman (upright) type should be encircled in pencil, while bold letters should be shown by a wavy underline.
8. *References*: In the text, references are indicated by superior arabic numbers (without brackets), and should be confined to publish work that is directly pertinent. References should be listed at the end of the paper in numerical order. Authors' initials should precede their names; cited article titles should be quoted in full, enclosed in quotation marks; and abbreviations of journal names should follow the style of *Chemical Abstracts* or *Physical Abstracts*, and be underlined for italics: P.W. Anderson, "More is different" *Science* **177**, 393 (1972) C.V. Negoita, *Fuzzy Systems* (Abacus Press, Tunbridge Wells, UK, 1980)
Citations such as 'personal communication', 'unpublished work', etc., are not acceptable as numbered references but can be included in parenthesis in the text. Do not use summaries as references.
9. *Proofs*: Page proofs will be sent to authors for correction, for return within 48 hours by airmail. Correction to proofs should be restricted to printers' errors only. Authors are entitled to 25 offprints of their article free of charge. Additional offprints may be purchased if they are ordered on the form sent with the proofs.
10. Manuscripts, whether accepted or rejected, will not be returned to the authors.
11. Submission of an article will be taken to imply that it has not been previously published and that it is not on offer to any other publisher.

CONTENTS

Reports and Surveys (Cad/Cam Technology for Dentistry, Case History-Automation of a Cement Works, Hospital Robots, Intelligent Pig-On-Line Inspection System, Knowledge-Based for Process Control, Robots Worldwide, Robot Investigates Volcano, Silicon Neurons, Smart Sensors, Surgery Robots Use Virtual Reality), B.H. Rudall (UK)	479
Dynamic Characteristics of Balanced Robotic Manipulators with Joint Flexibility, S.B. Lee and H.S. Cho (Korea)	485
Haptic Perception with an Articulated, Sensate Robot Hand, Sharon A. Stansfield (USA)	497
A Distributed-Processing Approach for Robot Dynamics Tuning, Albert Y. Zomaya (Australia) and Alan S. Morris (UK)	509
Efficient Sliding Mode Control for Robot Manipulator with Prescribed Tracking Performance, Ju-Jang Lee, Jung-Moon Lee and Jong-Soo Lee (Korea)	521
A Graph-Searching Approach to Trajectory Planning Robots, Witold Jacak, Ignacy Dulęba and Paweł Rogalinski (Poland)	531
Explicit Path Tracking by Autonomous Vehicles, Dong Hun Shin, Sanjiv Singh and Jun Jang Lee (USA)	539
Fuzzy Qualitative Model of a Robot Sensor for Locating Three-dimensional Objects, D.T. Pham and K. Hafeez (UK)	555
Fuzzy Logic-based Techniques for Motion Planning of a Robot Manipulator Amongst Unknown Moving Obstacles, Anupam Bagchi and Himanshu Hatwal (India)	563
