

Airway Management

Connect with the leaders...

...in airway management

Portex are recognised as leaders in the supply of high quality products for anaesthesia. With the introduction of our new range of anaesthetic circuitry Portex can now offer a complete system, from machine to patient.

A tailor made **Solution**

When an "off the peg" product doesn't meet your requirements, our Specials Service may provide the solution.

As a leading manufacturer of sterile solutions and aseptically compounded products, Fresenius Kabi is well qualified to make Specials. The fully licensed manufacturing site has excellent facilities and support functions, including QA/QC and microbiology to ensure rigorous quality standards for terminally sterilised and aseptic items. Similarly we know the importance of customer service and flexibility.

For further information on the tailor made solutions from Fresenius Kabi, telephone **01928 594238**.
