

ANNUAL MEETING OF ENTOMOLOGICAL CLUB, A. A. A. S.

The annual meeting of the Entomological Club of the American Association for the Advancement of Science will be held at the Museum of the Boston Society of Natural History, corner of Berkeley and Boylston Sts., Boston, commencing at 2 p. m., Tuesday, Aug. 24, 1880. It is proposed to send to every member of the American Association, and to all others who may favor the undersigned with their address for that purpose, a circular announcing the special subjects which will be presented at this meeting of the Club; and therefore all entomologists who desire to read communications at that time are requested to notify one of the undersigned before August 1st. This will ensure a fuller discussion of the topics presented, and, it is hoped, a larger attendance.

There will be an informal social gathering of entomologists at the rooms of the Boston Society of Natural History, 24th Aug., 1880, from 10 a. m. to 1 p. m. During the meeting of the American Association a room will be constantly open for the exclusive use of the entomologists.

B. PICKMAN MANN, *Sec'y*, SAMUEL H. SCUDDER, *Pres.*,
Cambridge, Mass. Cambridge, Mass.

CORRESPONDENCE.

DEAR SIR,—

Mr. W. H. Edwards, in his excellent article in the June No. of the CAN. ENT., page 113, inadvertently gives my residence as Bloomington instead of Carbondale. It would be well to correct this, for 50 miles north of Bloomington the form of *Satyrus* should be *Olympus*, or approaching it, at least, and not as he gives it.

I like Mr. Coquillett's suggestion of having uniform terms for describing the larvæ of many moths, but would suggest a little change in his terms for the spaces. Would it not be better to call the space between the dorsal and subdorsal lines the *dorsal* space, the space between the subdorsal and stigmatal lines the *subdorsal* space, the space below the stigmatal line to the venter proper the *substigmatal* space? As the prefix *sub* means under or below, it is evident that one not having the text of his suggestion would look for the *subdorsal* space below that line, etc.

G. H. FRENCH, Carbondale, Ill.
