Aricept[®]
 donepezil hydrochloride

A first step in Alzheimer's

BRIEF PRESCRIBING INFORMATION ARICEPT[®] (donepezil hydrochloride)

Please refer to the SmPC before prescribing ARICEPT 5mg or ARICEPT 10mg. **Indication:** Symptomatic treatment of mild to moderately severe Alzheimer's dementia. **Dose and administration:** Adults/elderly; 5mg daily which may be increased to 10mg once daily after at least one month. No dose adjustment necessary for patients with renal or mild-moderate hepatic impairment. **Children:** Not recommended. **Contra-Indications:** Hypersensitivity to donepezil, piperidine derivatives or any excipients used in ARICEPT. **Pregnancy, Lactation:** Excretion into breast milk unknown. Women on donepezil should not breast feed. **Warnings and Precautions:** Initiation and supervision by a physician with experience of Alzheimer's dementia. A caregiver should be available to monitor compliance. Regular monitoring to ensure continued therapeutic benefit, consider discontinuation when evidence of a therapeutic effect ceases. Exaggeration of succinylcholine-type muscle relaxation. Avoid concurrent use of anticholinesterases, cholinergic agonists, cholinergic antagonists.

Possibility of vagotonic effect on the heart which may be particularly important with "sick sinus syndrome" and supraventricular conduction conditions. Careful monitoring of patients at risk of ulcer disease including those receiving NSAIDs. Cholinomimetics may cause bladder outflow obstruction. Seizures occur in Alzheimer's disease and cholinomimetics have the potential to cause seizures. Care in patients suffering asthma and obstructive pulmonary disease. As with all Alzheimer's patients, routine evaluation of ability to drive/operate machinery. **Drug Interactions:** Experience of use with concomitant medications is limited, consider possibility of as yet unknown interactions. Interaction possible with inhibitors or inducers of Cytochrome P450; use such combinations with care. Possible synergistic activity with succinylcholine-type muscle relaxants, beta-blockers, cholinergic or anticholinergic agents. **Side effects:** Most commonly diarrhoea, muscle cramps, fatigue, nausea, vomiting and insomnia. Other common effects in clinical trials ($\geq 5\%$ and \geq placebo) headache, pain, accident, common cold, abdominal disturbance and dizziness. Rare cases of syncope, bradycardia,

heart block. Minor increases in muscle creatine kinase. **Presentation:** Blister packed in strips of 14. ARICEPT 5mg; white, film coated tablets marked 5 and ARICEPT, packs of 28. ARICEPT 10mg; yellow, film coated tablets marked 10 and ARICEPT, packs of 28. **Marketing authorisation numbers:** ARICEPT 5 mg; PA 822/2/1. ARICEPT 10mg; PA 822/2/2. **Marketing authorisation holder:** Pfizer (Ireland) Limited, Pharmapark, Chapelizod, Dublin 20, Republic of Ireland. **Further information from/Marketed by:** Pfizer (Ireland) Limited, Pharmapark, Chapelizod, Dublin 20, Republic of Ireland. **Date of preparation:** September 1997.
