Embroiled in the political events surrounding World War I and the failed Hungarian revolutions of 1918–19, a number of intellectuals fled Hungary for Germany and Austria, where they essentially created Weimar culture. Among them were Georg Lukács, Béla Balázs, László Moholy-Nagy, and Karl Mannheim. This collective portrait combines intellectual history with biographical detail.

**“Lee Congdon has no peer in the field of Hungarian intellectual history. His scholarship and grasp of the subject are superb.”**—*Walter Laqueur, Center for Strategic and International Studies, Washington, D.C.*

The Russian revolution of 1917 and the Iranian revolution of 1978–79 were shattering events that altered the temper of their times. What did they share besides their drama? Identifying a distinctive route to modernity which he calls autocratic modernization, Tim McDaniel explores the dilemmas inherent in the efforts of autocratic monarchies in Russia and Iran to transform their countries into modern industrial societies. In the process he makes a major contribution to the comparative study not only of revolution but also of development and dictatorship.

In July 1980, two weeks before the Gdansk shipyard strikes, Roman Laba arrived in Poland. He stayed there for almost two and a half years before he was arrested and expelled from the country for "activities noxious to the interests of the Polish state." Laba had set himself the ambitious task of documenting the history of Poland's free trade union.

The book uses this hard-earned first-hand information to challenge the commonly accepted view of the Polish intelligentsia as the driving force behind Solidarity and to demonstrate that the roots of the movement go back a decade earlier than the 1980 strikes.

## The Collapse of State Socialism

The Case of Poland

**Bartłomiej Kamiński**

Does the abrupt collapse of communist regimes in Eastern Europe arise only from errors in implementing the policy of state socialism, leaving the concept itself still a potentially valid one? Bartłomiej Kamiński argues to the contrary: state socialism is a fundamentally defective idea that was well carried out, enabling it to exist until its accumulated shortcomings made its survival extremely difficult.

**"Although many books have been written about the crisis of European communism and about developments in Poland in the 1970s and 1980s, no other book presents the type of analytic argument that can be found in Kamiński's study."**—Roger I. Kanet, *University of Illinois*

Edited by Edith W. Clowes,  
Samuel D. Kassow,  
and James L. West

## Crisis amid Plenty

The Politics of Soviet  
Energy under Brezhnev  
and Gorbachev

Thane Gustafson

This interdisciplinary collection of essays on the social and cultural life of late imperial Russia describes the struggle of new elites to take up a "middle position" in society—between tsar and people. During this period autonomous social and cultural institutions, pluralistic political life, and a dynamic economy all seemed to be emerging. However this book reveals the social, cultural, and regional fragmentation of the times.

Although the Soviet Union has the most abundant energy reserves of any country, energy policy has been the single most disruptive factor in its industry since the mid-1970s. This major case study treats the paradox of the energy crisis as an essential part of larger economic problems of the Soviet Union and as a key issue in determining the fate of the Gorbachev reforms.

## Peasant Russia

*Family and Community in the

CHRISTINE D. WOROBEC

*Peasant Russia* is a comprehensive examination of peasant life in central Russia in the decades immediately following serf emancipation. In this interdisciplinary study, Christine Worobec explores the world of peasant households and communities, elements of which live on in today's Soviet Union. In full detail she shows how peasant Russia retained its traditional institutions and customary practices in the face of the economic changes associated with industrialization and urbanization.

With a foreword by  
Edward J. Brown

Comparable in importance to Mikhail Bakhtin, Lydia Ginzburg distinguished herself among Soviet literary critics through her investigation of the social and historical elements that relate verbal art to life in a particular culture. Here, in her first book to be translated into English, Ginzburg examines the reciprocal relationship between literature and life by exploring the development of the image of personality as both an aesthetic and social phenomenon.

**"Lydia Ginzburg's books on verse and prose are unsurpassed in the Soviet Union and have already contributed to the best of Russian scholarship in the West. Judson Rosengrant's precise, fluent translation at last makes available to a broad readership her most ambitious book."**

A major reexamination of the novelist Vladimir Nabokov as "literary gamesman," this book systematically shows that behind his ironic manipulation of narrative and his puzzle-like treatment of detail there lies an aesthetic rooted in his intuition of a transcendent realm and in his consequent redefinition of "nature" and "artifice" as synonyms. Beginning with Nabokov's discursive writings, Vladimir Alexandrov finds his world view centered on the experience of epiphany, which grants the true artist intimations of an "otherworld."

## **Death in Quotation Marks**

Cultural Myths of the Modern Poet

Svetlana Boym

In a broad-ranging analysis of modern French and Russian writing—from poems, plays, and essays to revolutionary marches, fashion magazines, and suicide notes—Svetlana Boym reconsiders the making and unmaking of the self in writing and life. Examining both literal and figurative deaths of poets, she elaborates alternative strategies for reading text, life, and culture altogether. She questions the traditional boundaries between literary theory, social psychology, anthropology, and history. She brings poets back to life, back to *their* lives once again, and thereby resuscitates the dying art, the art of dying in words.

## **The Doctors' Plot of 1953**

Yakov Rapoport

In January 1953, the Soviet press agency Tass cited nine doctors—six of them Jews—for systematically doing away with prominent Soviet figures. Yakov Lvovich Rapoport, the renowned pathologist, was among this group and through this firsthand account of his imprisonment, he reveals the devastating climate of antisemitism, and the appalling disarray of medicine and science in the Stalinist era.

"For its account of human courage and wit confronting human malevolence, *The Doctors' Plot of 1953*...is one of those books that make the reader feel indebted to the author for having set pen to paper."

**Announcement and Call for Papers**

The skeptics, neopragmatists, poststructuralists, feminists, Marxists, historicists, Freudians, paleoconservatives, dissidents, and mavericks who have joined to establish **Common Knowledge** hold that fratricidal partisanship is a legacy of a time that is passing. **Common Knowledge** will publish work in cultural studies and intellectual history that redefines divisive terms and figures of the past and present in ways that make expanded sympathies credible. Now that the Berlin Wall is down, it is time to abandon simplistic distinctions— East versus West, left versus right, theory versus praxis, modern versus postmodern. It is time to elaborate a basis for practical, common knowledge.

**Common Knowledge** represents a commitment to go beyond established disciplines and, more importantly, beyond the factions at war in the literary and scholarly world. The idea that intellectual life is composed of "issues" and that issues are shaped like battlefields or game boards—with "sides" that one must "take"— is at best obsolete and impractical. **Common Knowledge** seeks to refine a new skepticism— a postmodern, postwar doubt of claims to knowledge and authority— that presents no obstacle to solidarity.

**Common Knowledge** will publish material that focuses on the timely and the particular rather than on the timeless and the theoretical— material that renders common knowledge possible. The editors solicit articles that reassociate intellectual communities divided by the cold war, that establish links among disparate intellectual schools, that deepen the conversation within each school, that break down the distinction between scholarly and narrative form, that reopen on higher ground debates about incommensurability, ambivalence, indeterminacy, untranslatability, and the will-to-power.

Manuscripts, proposals for articles, and books proposed for review should be sent to **Common Knowledge**, School of Arts and Humanities, The University of Texas at Dallas, Box 830688-JO 31, Richardson, TX 75083-0688.
