

CORRIGENDUM

Variation in eye lenses of two new Late Devonian phacopid trilobites from western Junggar, NW China – CORRIGENDUM

Rui-Wen Zong

<https://doi.org/10.1017/jpa.2023.31>, published online by Cambridge University Press, 29 May 2023

Recently, Zong (2023) described two new species of phacopid trilobites, namely *Omegops honggulelengensis* Zong, 2023 and *Omegops xiangi* Zong, 2023 from the Upper Devonian in western Junggar, Xinjiang, China. In the systematic paleontology section, the author has argued that *Phacops (Omegops) accipitrinus mobilis* Xiang, 1981 was not a subspecies of *Omegops accipitrinus* but a new species of *Omegops* (i.e., *O. honggulelengensis*). In addition, the author has proposed that *Clarksonops* Crônier in Crônier and Waters, 2022 is a junior synonym of *Omegops* Struve, 1976 and that its type species, *Clarksonops junggariensis* Crônier in Crônier and Waters, 2022, should be reclassified as a new species of *Omegops* (i.e., *O. xiangi*). However, the author ignored the validity and priority of the subspecies name *mobilis* and species name *junggariensis* (ICZN, 1999, Art. 23), and therefore the preceding two new names are invalid. They should be replaced by *Omegops mobilis* (Xiang, 1981) n. comb. and *Omegops junggariensis*

(Crônier in Crônier and Waters, 2022) n. comb., respectively. Thanks, Sven Daasborg, for the kind reminder about the nomenclatural aspects, and the author apologizes for this error.
