JOURNALS

Journal of Dairy Research

Published for the Institute of Food Research and the Hannah Research Institute

Executive Editors

D. G. Chamberlain, *Hannah Research Institute, UK*

E. C. Needs, *Hannah Research Institute, UK*

Journal of Dairy Research publishes original scientific research on all aspects of mammary biology and dairy science including: the physiology, biochemistry, cell biology and endocrinology of lactation; animal husbandry, milk production, composition, preservation, processing and separation; biotechnology and food science; properties of milk proteins and other components; dairy products such as cheese, fermented milks and spreads; relevant studies in bacteriology, enzymology and immunology, the use of milk products in other foods; and the development of methods relevant to these subjects.

Experimental Agriculture

INSTRUCTIONS TO CONTRIBUTORS

Electronic Submission of Manuscripts

Contributions for consideration for publication should be submitted online at <http://www.editorialmanager.com/eag>

Editorial Policy

With a focus on the tropical and sub-tropical regions of the world, *Experimental Agriculture* publishes the results of original research on field, plantation and herbage crops grown for food or feed, or for industrial purposes, and on farming systems, including livestock and people. It reports experimental work designed to explain how crops respond to the environment in biological and physical terms, and on the social and economic issues that may influence the uptake of the results of research by policy makers and farmers, including the role of institutions and partnerships in delivering impact. The journal also publishes accounts and critical discussions of new quantitative and qualitative methods in agricultural research, and of contemporary issues arising in countries where agricultural production needs to develop rapidly. There is a regular book review section and occasional, often invited, reviews of research. Most papers are published within six months from acceptance.

The minimum standards for a paper to be considered by the Editor and the referees are set out below:

- The title page, all headings and the references must conform to the style of *Experimental Agriculture*.
- Each table and figure must be cited in the text of the typescript.
- All figures to be supplied as separate TIFF or EPS files wherever possible.
- The statistical treatment of experimental data must conform to the instructions given in Riley, J. (2001). Presentation of statistical analyses. *Experimental Agriculture* 37: 115–123.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

Experimental Agriculture

CONTENTS

- Singh, R. J., Ahlawat, I. P. S. and Kumar, K.** Productivity and profitability of the transgenic cotton–wheat production system through peanut intercropping and FYM addition 321
- Mazid, A., Shideed, K., El-Abdullah, M., Zyadeh, G. and Moustafa, J.** Impacts of crop improvement research on farmers' livelihoods: the case of winter-sown chickpea in Syria 336
- Andriarimalala, J. H., Rakotozandriny, J. N., Andriamandroso, A. L. H., Penot, E., Naudin, K., Dugué, P., Tillard, E., Decruyenaere, V. and Salgado, P.** Creating synergies between conservation agriculture and cattle production in crop–livestock farms: a study case in the Lake Alaotra region of Madagascar 352
- Buakum, B., Limpinuntana, V., Vorasoot, N., Pannangpetch, K. and Bell, R. W.** Is deep sowing beneficial for dry season cropping without irrigation on sandy soil with shallow water table? 366
- Subehia, S. K., Sepehya, S., Rana, S. S., Negi, S. C. and Sharma, S. K.** Long-term effect of organic and inorganic fertilizers on rice (*Oryza sativa* L.)–wheat (*Triticum aestivum* L.) yield, and chemical properties of an acidic soil in the Western Himalayas 382
- Grace, J. K., Sharma, K. L., Sumachandrika, D., Srinivas, K., Mandal, U. K., Raju, B. M. K., Korwar, G. R., Venkateswarlu, B., Kumar, S., Maruti Sankar, G. R., Munnalal, Kumar, T. S., Reddy, K. S. and Shinde, R.** Effect of long-term use of tillage, residues and N levels in Sorghum (*Sorghum vulgare* (L)) – castor (*Ricinus communis*) cropping system under rainfed conditions – crop responses and economic performance – part I 395
- Prasanna, R., Babu, S., Rana, A., Kabi, S. R., Chaudhary, V., Gupta, V., Kumar, A., Shivay, Y. S., Nain, L. and Pal, R. K.** Evaluating the establishment and agronomic proficiency of cyanobacterial consortia as organic options in wheat–rice cropping sequence 416
- Pamponet, T. C., Gomes, F. P., de Almeida, A.-A. F., Mielke, M. S., Gomes, L. M. C. and Pedrosa, A. M.** Photosynthetic characteristics and fibre production following defoliation in *Attalea funifera* Mart., arecaceae, growing under full sun and forest understorey 435
- Aschonitis, V. G., Lithourgidis, A. S., Damalas, C. A. and Antonopoulos, V. Z.** Modelling yields of non-irrigated winter wheat in a semi-arid Mediterranean environment based on drought variability 448
- Bakhsh, A., Bashir, I., Farid, H. U. and Wajid, S. A.** Using ceres-wheat model to simulate grain yield production function for Faisalabad, Pakistan, conditions 461
- Book reviews** 476
