

# 2011 CAEP/ACMU Scientific Abstracts

## Keyword Index

<b>KEYWORD</b>	<b>ABSTRACT No.</b>				
<b>A</b>					
acute abdomen	216	cardioversion	200	discrepancies in interpretation	197
acute bronchiolitis	192	case series	218	drowning	189
acute cardiogenic pulmonary edema	176	CCFP-EM	209	drug therapy	175
acute coronary syndrome	214	central venous access	213	<b>E</b>	
acute respiratory conditions	192	cervical spine injury	175	early goal directed therapy	199, 200
acute respiratory distress	186	CHADS2	200	ED utilization	202
administrative database	175, 180, 186, 189, 208, 216, 217	chest pain	174	educational intervention	178
admission rates	179, 180	chest radiography	214	elderly patients	192, 207
advanced care paramedics	183, 217	children	178	emergency crowding	206, 216
adverse events	186, 187, 193	cholelithiasis	195	emergency department flow	178
adverse outcomes	202	chronic obstructive pulmonary disease	174	emergency department relapse	192
airway management	179	clavical fracture	193	emergency department selection	183
accessibility	175	clinical decision rules	174, 183, 195, 211	emergency department surge	196
allied health professionals	188, 211	clinical decision units	180, 201	emergency department targeted ultrasound (EDTU)	194
analgesia	198, 203, 204	clinical practice guidelines	182, 190, 192, 216	emergency dispatch	182, 184, 191
antiarrhythmic therapy	208	cluster randomized trial	181	emergency medical services	179, 181, 182, 188, 189, 190, 194
anticoagulation	200	cognitive impairment	177	emergency overcrowding	200, 202, 207, 211
aortic dissection	214	cohort study	198, 200, 202, 204, 207	emergency physician ultrasonography	195
appendicitis	217	communication	208	emergency service	176
appropriateness evaluation protocol	208	communication skills	178	emergency services	175
atrial fibrillation	179, 191, 197, 198, 200, 202, 207, 208	comparative study	193	EMS	201, 209
audit	209	computed tomography	174, 180	end-tidal capnography	203
automated cardiopulmonary resuscitation devices	181	congestive heart failure	176	epidemiology	205
automated external defibrillator	188, 211	continuing medical education	211	etomidate	191
<b>B</b>					
barriers	198	continuous positive airway pressure	176	<b>F</b>	
bed occupancy	201	core competencies	184	facilitation of care	217
bed utilization	208	CPOE	200	faculty development	213
before/after study	186, 187	CPR	214	feedback	214
bicycle helmets	181	CQI	214	fentanyl-midazolam	212
blunt trauma	183	cricothyroidotomy	183	flutter	191
<b>C</b>					
call volume	201	cross-sectional survey	196	frequent ED users	217
Canadian c-spine rule	177	croup	198	<b>G</b>	
Canadian Triage and Acuity Scale (CTAS)	177, 178, 179	CT imaging	203	gastroenteritis	175
cardioembolic	196	CT scanning	199	geriatrics	210
cardiopulmonary resuscitation	182, 184, 187, 191	CTAS	210, 213	GRADE	216
		cyclling helmets	199	guideline compliance	213, 215
		<b>D</b>			
		decision support techniques	174, 175	guideline development	190
		Delphi process	184	<b>H</b>	
		diabetes	205	head injury	212
		diagnostic accuracy	184	head trauma	206, 215
		diagnostic imaging	197		
		diagnostic test characteristics	193		
		digital photography	196		
		digital rectal examination	195		

health records review	199, 202, 203, 205, 211, 212, 215, 216, 217	<b>O</b>	quality indicators	210
health services accessibility	175	observation units	quality of care	214, 215
helicopter EMS	216	online survey	quality of life	179
high acuity	210	outer appendiceal diameter		
hockey	206		<b>R</b>	
home care referrals	210	<b>P</b>	radiation	199, 203
homelessness	205	pain management	random plasma glucose	204
homicide	205	pain protocols	randomized controlled trial	175, 196, 203
hospital	175, 176	paramedics	randomized crossover trial	183
human immunodeficiency virus	175	patient behavior	rapid improvement events	214
hypoglycemia	205	patient perception	rapid sequence intubation	191
		patient preferences	readiness for discharge	201
		patient safety	regional variation	185
		patient satisfaction	registry	183
		patient simulation	reliability	178
		patient-related outcomes	renal colic	185, 203, 204
<b>I</b>		pediatric appendicitis	retrospective cohort	179
implementation	177, 207	pediatric forearm fractures	risk assessment	174, 176
information board	185	pediatrics	risk stratification	180
in-hospital cardiac arrest	211		risk stratification score	187
injury prevention	181	performance	rural EM	211, 215
intentional self-harm	212	physician productivity	rural medicine	194
internet use	189	pigtail catheter		
inter-rater reliability	210, 213	pilot study	<b>S</b>	
isolated dysphasia	196	pneumothorax	scaphoid fractures	197
		point-of-care systems	screening	199, 200, 204, 205
<b>K</b>		post-traumatic stress disorder (PTSD)	screening tools	177
ketamine-propofol	212	practice patterns	seasonal variations	198
knowledge translation	181, 208	practice variation	secular trends	214
		pre post study	sensitivity	215, 218, 182,
<b>L</b>		pre-diabetes	sepsis	187, 190, 199,
lean processes	214	prehospital care		200, 202, 205,
legislation	181, 199	pre-hospital electrocardiography		206, 213, 215
length of stay	182, 184, 186, 189, 191	pre-hospital medical directives	serum lactate	206
long term care	208	pre-test probability	severity perception	208
long term outcomes	197	prevalence	shift change	194
low acuity patients	208, 217	primary care access	simulation methodology	195
low back pain	211	procedural sedation	social networking	218
		procedural sedation and analgesia	soft tissue infections	196
<b>M</b>		procedural skills	specialist consultation	178, 182, 189, 191, 192, 184
management	180	prognosis	specialty consultations	206, 208
medical directive errors	201	prospective cohort	specificity	215, 218
medical dispatch	187		spectrum of illness	214
medical education	184, 193, 195, 205	prospective cross-sectional study	splint-only strategy	202
medical error	197		spontaneous cardioversion	197
medical record review	181, 188, 191	prospective pilot study	stroke	201
meta-analysis	194	prospective studies	subarachnoid hemorrhage	218
methicillin-resistant <i>Staphylococcus</i> <i>aureus</i> (MRSA)	185	prospective study	subject recruitment	218
migraine	173	protocol compliance	surge planning	196
mortality prediction	202	psychiatry	survey	176, 179, 182, 183, 190, 191, 194, 195, 198, 202, 205, 208, 209, 211, 213, 219
		pulmonary embolism		
<b>N</b>			suture removal	188
needs assessment	211, 213	<b>Q</b>	symptom scores	179
neuroimaging	212, 215, 218	qualitative research		
nurse practitioners	210	quality improvement		
nursing	175, 177			

syncope	179	time to treatment	200, 215	<b>V</b>	
systematic review	173, 187, 188, 195, 206	torus fractures	202	validity	177
system-wide intervention	207	transient ischemic attack	174, 180, 187	variability in practice	197
<b>T</b>		trauma	212	venous thromboembolism	197
teaching aids	193	traumatic brain injury	215	video tutorials	186
therapeutic hypothermia	181, 194	triage	195	violence	219
therapy	173, 191	troponin	198, 214	vomiting	175
throughput delays	206	<b>U</b>		<b>W</b>	
TIA	196, 201	ultrasound	197, 209, 215, 216, 217, 218	wait times	185, 189, 195
time to antibiotics	205	urinary tract infection	193	weather patterns	198
time to CT	212			Well's criteria	197
				wound care	188
