MA Presidential Blog

From 14 April 2022, when Dr Colin Foster becomes President of the MA, he will be writing a blog and posting something every other Thursday throughout his year as President. He is intending to address issues of interest and relevance across the entire range from early years through to university – not an easy task, but he is going to do his best! These will follow on from Dr Chris Pritchard's Presidential Essays, but the format and frequency will be different.

Colin hopes that the blog will stimulate conversations within the Association about important issues within mathematics teaching and learning, and there will be a facility to reply/comment underneath the blogposts, so it can support some discussion. Please sign up at

<https://blog.foster77.co.uk/>

now and take a look at the first post on 14 April.
