INTERNATIONAL PHONETIC ASSOCIATION

Subscription Form

Send to: *Treasurer, International Phonetic Association
Centre for Language and Communication Studies,
Trinity College, Dublin 2, Ireland*

The subscription to the Association is £13 (or US\$25) per annum, due each January. Payment can be made by cheque, by credit card using the form below, or by direct credit to UK Postal Giro Account No. 57 009 4208. Life membership can be obtained by paying the equivalent of fifteen years' annual subscription (£195 or US\$375). Student membership for 1 year is £6.50 (or US\$12.50) when accompanied by a letter from the student's department certifying full-time student status.

Please enrol me as a member of the International Phonetic Association. I am enclosing the sum of as the subscription for the current year, 19..... Please send me the Journal and other publications as they are issued.

Please write your name and address in BLOCK CAPITALS.

for members of the International Phonetic Association

Phonetica

International Journal of Speech Science

Editor

K. Kohler, Kiel

Editor for North America

R.L. Diehl, Austin, Tex.

Phonetic Science is a field increasingly accessible to experimental verification. Reflecting this development, 'Phonetica' is an international and interdisciplinary forum which features expert original work covering all aspects of the subject: descriptive linguistic phonetics and phonology (comprising segmental as well as prosodic phenomena) are focused side by side with the experimental measuring domains of speech physiology, articulation, acoustics, and perception. 'Phonetica' thus provides an overall representation of speech communication. Papers published in this journal report both theoretical issues and empirical data.

Phonetica

1997: Volume 54

4 issues per volume

Languages: English, French, German

ISSN 0031-8388

Listed in bibliographic services, including
Current Contents[®], *Index Medicus*,
Reference Update, *Biological Abstracts*.

Special rates for members of the International Phonetic Association (IPA)

CSL offers the right tools for acoustic phoneticians.

The CSL contains extensive speech analysis capabilities. Files acquired with Kay's Palatometer allow physiological data to be compared to acoustic results.

The IPA Transcription Tutorial is presented in a multimedia environment. When students are unsure of proper transcription, a vowel or consonant chart can be displayed which speaks each phoneme and provides a spectrographic display with a click of the mouse.

The LPC numerical editor allows users to mark columns of data (e.g., specific formants or F_n values) for quick, precise editing. A variety of functions is available.

CSL™/Computerized Speech Lab offers extensive analysis formats, editing functions, and other core capabilities that make it the instrument of choice for acoustic phoneticians. The CSL is a completely integrated system. It includes both hardware and software and works on a host PC personal computer. Some exciting features and options include:

Features

- Dual-channel data acquisition with CD-quality audio playback fidelity (four-channel option available)
- Extensive analysis formats including spectrograms, waveforms, LPC (slices and formant history), pitch, energy, and more
- On-screen IPA transcription tool with all 196 characters including diacritics
- Integration with Palatometer linguapalatal contact patterns to link phoneme production and acoustic results
- Extensive commands for editing, digital filtering, warping, splicing, mixing, and appending speech samples for precise manipulation

Programs for Research and Teaching

- Speech synthesis (LPC-derived, residual-driven, and pitch-synchronous) with both graphic and numerical editing of formant frequencies, bandwidths, and fundamental frequency
- Multimedia IPA teaching software with each spoken phoneme analyzed spectrographically and with built-in exercises for student practice
- Phonetic database offers 82 MB of speech sampled from 25 languages with over 1,870 samples on CD-ROM
- Real-time options including pitch, spectrograms, and LPC-based spectra; ideal for classroom demonstrations or lab exercises

Kay offers competitive package pricing and excellent support for the CSL. Call **1-800-289-5297** for more information.

Journal of the International Phonetic Association

NOTES FOR CONTRIBUTORS

Policy. The *Journal of the International Phonetic Association* (formerly entitled *Le Maître Phonétique*), is concerned with all aspects of the theory, description, and use of phonetics and phonology. Contributions are subject to review, and to the Editor's final decision as to publication. The primary language of the *Journal* is English, though contributions in other languages of wide scholarly currency, such as French, German, and Russian will be accepted. Contributions in English should use either British or American standard spelling and punctuation. Contributions in other languages should be accompanied by an English abstract.

Manuscript style. Contributors are encouraged to submit their text, if possible, both in printed form and as a computer file. Printed contributions should be submitted in typewritten or computer printout form, in double spacing with wide margins, printed on one side of the sheet only. Contributions in the form of computer files should be submitted either on diskette or by attachment to an e-mail message to the editor. Most standard word-processing formats (both for PC and Macintosh) are supported. Text should use 12 pt. Times font (in addition to fonts used for special symbols), and should contain a *minimum* of formatting as to page layout: there is no need to adjust line-spacing, page breaks, indentations, etc.

The text should use two levels of headings: (1) Main headings placed above the paragraph, numbered, and formatted flush left, bold; (2) subheadings, also placed above the paragraph, unnumbered, and formatted flush left, italic, with a period following. Acknowledgements (with a centred bold heading) follow the text and precede the references. Tables should be included in the text at the appropriate location. The style conventions of the *Journal* should be followed wherever possible, and the Editor reserves the right to alter contributions so that they conform to house style.

Footnotes and references. Footnotes should be avoided as far as possible. Citations are to be made *in the text* by giving in parentheses the name of the author and the year of publication, and where relevant the page(s) referred to: e.g. "... (Jones 1963) ...", or "... Jones (1983: 453) ...". Where essential, footnotes should be indicated in superscript consecutively throughout the text, and collected as a separate sheet at the end of the manuscript. All works referred to should be listed at the end of the article, using the following format:

References

- CHAO, Y.-R. (1930). A system of tone letters. *Le Maître Phonétique* 30, 24-27.
O'CONNOR, J. D. and ARNOLD, G. F. (1973). *The Intonation of Colloquial English*. Second edition. London: Longman.
SAMPSON, G. (1987). Probabilistic models of analysis. In Garside, R., Leech, G., and Sampson, G. (editors), *The Computational Analysis of English*, 30-41. London: Longman.

Transcriptions and figures. Phonetic transcriptions should make use of the symbols and conventions of the Association's alphabet in its latest revision. Contributions in the form of computer files should use a phonetic font modelled on 12 pt. Times: preferably either SIL Doulos IPA Regular (freely available for both Windows and Macintosh computers via the Internet at <ftp://ftp.sil.org/fonts>) or IPA Kiel, available for purchase from Linguist's Software, Inc., PO Box 580, Edmonds, WA 98020-0580, USA.

Figures may be submitted either in computer file form, using one of the standard drawing programs for microcomputer, or as clear originals on paper. In either case they should be drawn to a standard which will allow them to be reproduced clearly in photo-reduction.

Proofs and offprints. Proofs will be sent to the author (or their nominee), who will be expected to correct them and return them to the Editor, by airmail where appropriate, within ten days of receipt. The Editor may also confer with authors by e-mail; please supply an e-mail address if available. Upon publication, 25 copies of a contribution will be supplied to the author free of charge; further offprints may be purchased at cost.

Submission of manuscripts. Contributions should be sent to Martin Barry, Editor of JIPA, Department of Linguistics, The University of Manchester, Oxford Road, Manchester, M13 9PL, UK. E-mail: martin.barry@man.ac.uk
