Medicine

Books and Journals from
Cambridge University Press

The Cambridge Medicine programme focuses its book publishing in a defined set of core clinical areas with our great strength in the clinical brain sciences. Other specialties of significant focus include reproductive medicine/obstetrics and gynaecology, anaesthesia and critical care, emergency medicine and pathology.

Our journals programme covers a broad spectrum of medical disciplines including emergency and disaster medicine, epidemiology and infectious diseases, biomedical science, genetics, nutrition, mental health and psychiatry, and neuroscience.

We partner with many learned societies including The Society for Healthcare Epidemiology of America, the Neuroscience Education Institute, and the Royal College of Obstetricians and Gynaecologists.

Advancing Science, Improving Care

October 4-8, 2017

San Diego, CA

www.idweek.org

A JOINT MEETING OF

3M Science.
Applied to Life.™

Take control of nasal decolonization.

An evidence-based protocol you can control.

With a quick and easy one-time application of 3M Skin and Nasal Antiseptic, clinicians can directly observe product application and ensure protocol compliance, unlike other methods of nasal decolonization. This is the only nasal antiseptic with clinical evidence demonstrating SSI risk reduction versus prescription mupirocin when part of a comprehensive protocol.¹ Include it in your pre-op protocol to improve patient safety and support antibiotic stewardship.

Make the change that makes a real difference. Go to [3M.com/NasalAntiseptic](https://www.3m.com/NasalAntiseptic) for a free trial.
