transportation and close to
many hotels

10TH INTERNATIONAL SYMPOSIUM ON THE NUTRITION OF HERBIVORES

Herbivore nutrition supporting agro-ecological and sustainable intensification approaches

Producing better with fewer inputs is the main challenge imposed to agriculture by the increase of global food demand and environmental issues. Agro-ecology and sustainable intensification, mainly by stimulating natural processes to reduce inputs, proposes a framework to cope with this challenge and is emerging in animal science. The sessions of the Symposium will cover basic herbivore nutrition to nutritional strategies to improve nutritional efficiency, product quality, health and animal welfare, and reduce waste. The sessions will address organisational levels from genome to organ, animal, herd (and farm), and consider herbivores under temperate, Mediterranean and tropical climates.

Clermont-Ferrand
is located halfway
between northern
and southern Europe
45 minutes by plane
or 3 hours by train from Paris,
the city is close
to the INRA
Auvergne-Rhône-Alpes
Research Centre

British Society of Animal Science

The British Society of Animal Science aims to provide an opportunity for those with an interest in animals and animal science to exchange views, ideas and information. It is an energetic and active society with about 1000 members from over 50 countries throughout the world. Today, as ever, the Society is the natural meeting point for all of those with an interest in animal science. Its membership is drawn from research, education, advisory work, commerce and practical animal keeping.

The Society's Journal is *Animal* which publishes high quality fundamental and applied research and is an exciting international journal of animal bioscience. *Animal* publishes cutting edge research, hot topics and horizon-scanning reviews on animal-related aspects of the life sciences.

The Society organises major scientific and specialist conferences on key issues facing the science related to animals.
