Plant Genetic Resources: Characterization and Utilization

Aims and Scope

Published on behalf of the National Institute for Agricultural Botany, this international peer-reviewed journal provides a forum for describing the application of novel genomic technologies, as well as their integration with established techniques, towards the understanding of the genetic variation captured in both *in situ* and *ex situ* collections of crop and non-crop plants.

The journal also provides an airing for the wider issues relevant to plant germplasm conservation and utilization, including those dealing with policy and its wider implications, and studies involving interpretation and synthesis of data. Multi-disciplinary approaches that incorporate both a technical and a socio-economic focus are welcome, as are papers which take a wider cross-cutting view of the subject.

Technical aspects cover developments in technologies of potential or demonstrated relevance to the analysis of variation and diversity at the phenotypic and genotypic levels; the development of rational germplasm collection, evaluation and conservation strategies; and the impact of crop genetic modification and biotechnology on plant genetic resources. Non-technical aspects will include ethical, legal, commercial and social issues of relevance, in particular relating to farmers' rights, intellectual property and ethnobotany.

Plant Genetic Resources: Characterization and Utilization publishes four types of paper:

- Full research paper - A full account of a complete project with experimental details.
- Short communication - A preliminary account of early findings in ongoing work.
- Research notes - Short accounts of small projects that might not merit a full paper but that nonetheless would be of interest to the community.
- Reviews - Literature overviews of recent research in a large subtopic or comparative reviews of related work in different species. Book reviews are also welcomed.

Editor-in-Chief

Robert Koebner
Crop Genetics Department, John Innes Centre, UK

Plant Genetic Resources: Characterization and Utilization is an international journal published tri-annually by CABI Publishing in April, August and December.

Special sales and supplements:

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes proceedings on behalf of academic and corporate sponsors. Please contact Melanie Fox at the Wallingford address for further details.

Subscription information:

The subscription rates for Volume 2, 2004 (3 issues) are:

Institutional subscription

Internet/Print Package £145.00/\$225.00 (Americas only)

Internet only £115.00/\$200.00 (Americas only)

Print only £135.00/\$235.00 (Americas only)

Any **supplements** to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Back volumes are available. Please contact CABI Publishing for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Despatch: deliveries outside the UK are by ASP Printflow Airsaver unless other arrangements are made. Customers requiring airmail delivery should indicate clearly their requirements and add an additional 10% to the relevant subscription price.

US POSTMASTERS: please send address corrections to CABI Publishing at the Wallingford address.

Information for Authors:

Two copies of the manuscript and artwork should be sent to:

Mary McPhee
PGRC&U, Editorial Office
NIAB
Huntingdon Road
Cambridge CB3 0LE, UK
Tel: +44 (0)1223 276381; Fax: +44 (0)1223 277602
E-mail: mary.mcphee@niab.com

Notes for Authors are available on the internet at
<http://www.cabi-publishing.org/pgr>

Offprints: The corresponding author of an accepted paper will receive a pdf offprint. Additional offprints are available for a fee and should be ordered at proof stage. **No page charges or submission charges are levied by this journal.**
