Accountancy Comes of Age

The Development of an American Profession,
1886–1940

by Paul J. Miranti, Jr.

Paul Miranti offers a historical analysis of the factors contributing to the rise of the certified public accounting profession in the United States from 1886 to 1940. "An important book. . . . Miranti's particular success is to relate the profession's history to broader economic, political, and social changes."

—William H. Becker

Easy Money

Oil Promoters and Investors in the Jazz Age

by Roger M. Olien and Diana Davids Olien

Roger Olien and Diana Olien detail the economic context of the great oil speculation of the 1920s and relate it to real estate and securities markets, outlining the activities of several specific oil promoters. "[A] sprightly, well-researched account of a neglected area of business history."—Maury Klein

New Books in Twayne's Evolution of American Business Series

SERIES EDITOR: EDWIN J. PERKINS,
the University of Southern California

This series studies the many ways in which business has affected U.S. development, by analyzing important business concepts and examining the institutions and individuals that have shaped economic growth.

The Credit Card Industry: A History

LEWIS MANDELL, the University of Connecticut

Provides a history of the worldwide economic behavior set in motion by plastic money and its expansion of financial services to the middle and lower classes.

Aug. 1990 0-8057-9810-2 Cloth \$24.95
0-8057-9816-1 Paper \$10.95

American Commercial Banking: A History

BENJAMIN J. KLEBANER, City College of CUNY

Surveys the evolution of banking to clarify the complexities wrought by recent changes such as the Deregulation Act of 1980.

Sept. 1990 0-8057-9804-8 Cloth \$24.95
0-8057-9815-3 Paper \$12.95

The U.S. Tire Industry: A History

MICHAEL J. FRENCH, University of Glasgow, Scotland

Describes how the emergence of automobile mass production in 1913 brought unprecedented prosperity to the rubber industry; outlines the industry's reformations in corporate structure and technology and its increased reliance on imported raw materials.

Nov. 1990 0-8057-9817-X Cloth \$19.95

Enterprise

The Dynamic Economy of a
Free People

Stuart Bruchey

Arguing that the central fact explaining the success of the American experiment is the development of the economy, the distinguished historian Stuart Bruchey shows the reciprocal relationship between economic growth and values, law, and social and political change, as well as between economic development and the more traditional variables of capital, labor, and resources. Twenty years in the writing, *Enterprise* reaches deep into the American past—to fourteenth-century Italy—to retrace the origins of American capitalism.
656 pp./49.50 cloth

The Corporate State and the Broker State

The Du Ponts and American National
Politics, 1925-1940

Robert F. Burk

"This is the best book in three decades on two of the most important questions in twentieth-century American history—how did Conservatism take its particular shape and what role has Big Business really played in public affairs. Robert Burk illuminates these questions and others in an incisive book that is a joy to read."

—John Milton Cooper, Jr.,
University of Wisconsin, Madison

"Plumbing the actions and ideas of the du Ponts and their allies, Burk treats a topic of substantial significance in the political, economic, and even social history of the United States. He does it very well, not only in providing a great deal of new and important information about the 1920s and 1930s but also in analyzing these data in light of other ongoing developments in America."

—Donald McCoy, University of Kansas
14 halftones/\$35.00 cloth

Scale and Scope

The Dynamics of Industrial Capitalism
Alfred D. Chandler, Jr.

Ten years in the making, this is Chandler's first major book since his Pulitzer Prize-winning *The Visible Hand*. This long-awaited volume concentrates on patterns of industrial growth and competitiveness in the three leading industrial nations—the United States, Germany, and Great Britain spanning the period from the 1880s to the 1940s. Chandler shows how large industrial firms developed at the end of the nineteenth century through exploiting economies of scale and scope.

"The book is important. It traces the evolution of the economic environment in which we breathe, and which we need to interpret without the blinders of doctrine or dogma... It is an exhaustive, nation-by-nation, industry-by-industry, company-by-company survey... Chandler is what social science is all about."

—Bernard A. Weisberger,
Washington Post Book World

The Belknap Press
800 pp/\$35.00 cloth

The Transformation of Corporate Control

Neil Fligstein

In this book, Neil Fligstein takes issue with prevailing theories of the corporation and proposes a radically new view. In his scheme, the firm is not driven by market forces. Rather, the firm and the market itself are shaped by the state and its policies toward business.

EDISON AND THE BUSINESS OF INNOVATION

Andre Millard

Tracing Thomas Edison's business career, Andre Millard reveals him to be an entrepreneur of extraordinary vision. From extensive research in the Edison archives, Millard presents new information and fresh interpretations of old issues.

Edison and the Business of Innovation places Edison squarely in the context of the business environment of his time, measuring him against his peers in late 19th- and early 20th-century America. It shows why he succeeded in certain innovations — and why he failed miserably in others.

Seeking to understand Edison's method by examining the changing work culture of his laboratory, Millard bridges the gap between business and technology, showing how each influenced the other.

Scale and Scope

The Dynamics of Industrial Capitalism
Alfred D. Chandler, Jr.

Ten years in the making, this is Chandler's first major book since his Pulitzer Prize-winning *The Visible Hand*. This long-awaited volume concentrates on patterns of industrial growth and competitiveness in the three leading industrial nations—the United States, Germany, and Great Britain spanning the period from the 1880s to the 1940s.

Chandler shows how large industrial firms developed at the end of the nineteenth century through exploiting economies of scale and scope which required a certain sets of investments: in production facilities large enough to secure cost advantages, in international marketing and distribution networks, and in a management organization capable of administering the new enterprises.

Chandler brings masterful insight to the history of multinational enterprises and this work will reorient business and economic history for years to come.

Newcomen Awards in Business History

For the best article published in the *Business History Review* during the previous year the Society will award a prize of \$300 and a scroll. For the best article published in the *Business History Review* during the previous year by a graduate student or a recent Ph.D. who has not published a book in business history, the Society will award a special prize of \$150 and a scroll. Criteria for selection include originality, value, breadth and interest of contribution, quality of research materials and methods, and quality of presentation.

Winners will be selected by a panel of judges consisting of the editors and the members of the editorial board of the *Business History Review*, none of whom shall be eligible to receive a prize. The awards are administered by the editorial office of the *Review*. No special prize will be awarded in years when, in the opinion of the judges, no eligible article suitable for the prize was published, and no person may be awarded both prizes in any one year.

**ANNOUNCING
THREE AWARDS
IN
BUSINESS HISTORY**

**PRESENTED BY
THE NEWCOMEN
SOCIETY
OF THE
UNITED STATES**

Thomas Newcomen Book Award in Business History

The Newcomen Society of the United States, in cooperation with the *Business History Review*, will award in 1992 the tenth in a series of triennial prizes consisting of \$1,000 and a scroll for the best book on the history of business published in the United States between 1989 and 1991. "Business history" is defined in its broadest sense to include not only the history of firms or industries, but books tracing interactions of business leaders, analyses of business philosophy or behavior, and studies of the adjustment of businesses and businesspeople to their economic, political, and social environment. Criteria for selection will include contribution to knowledge, depth of analysis, soundness of reasoning, clarity of style and organization, and general readability and format.

GUIDELINES FOR CONTRIBUTORS

General Information

Manuscripts are considered for publication on the understanding that they are not concurrently under consideration elsewhere and that the material—in substance as well as form—has not been previously published.

Three copies of the manuscript should be submitted.

Authors should identify themselves only on a separate title page that provides name, mailing address, and telephone number. Authors must also remember not to identify themselves in the body of the manuscript; specifically, references to their own work in the text should be in the third person, and citations should be written without possessive pronouns—not “See my. . . .”

Each article should be accompanied by a précis of 75–100 words outlining the main point(s) of the paper and placing the article in context. Subheads should be used to divide the manuscript into three or four sections (or more, depending on length).

We do not have an upper or lower page limit, but articles usually run between 25 and 60 typescript pages, including notes and other material.

Articles must contain notes in the humanities style, not references as in the social sciences.

We are always eager to publish illustrations, but authors should not include originals of illustrative materials at the time of submission; photocopies of such material may be included.

Authors of accepted manuscripts will receive two copies of the issue in which the article appears and twenty-five free offprints.

Manuscript Preparation

ALL material—including extracted quotations and notes—must be double-spaced. Legible photocopies or word-processed originals may be submitted. Use of dot-matrix printers is discouraged.

Notes should be numbered consecutively and citations should be placed at the end of the text. Do not place footnotes at the bottom of the page (see word-processing instructions).

Each table or figure should occupy a separate page and should be numbered (in arabic numerals) and grouped together between the text and the notes. The position of these items should be indicated in the text (as, “see Table 3”), but they should not be mingled with the text and no extra space should be left for them there. Each table and figure must be accompanied by a complete source.

We use the 13th edition of *The Chicago Manual of Style* (1982) and spell and hyphenate words according to Webster’s *Ninth New Collegiate Dictionary*.

The journal encourages authors to use gender-neutral prose in all cases where it is not anachronistic to do so; male nouns and pronouns should not be used to refer to people of both sexes.

We use the day-month-year form for dates, as 11 February 1990.

Double quotation marks should be used for journal titles and direct quotation; single quotation marks are used for quoted material inside quotations.

Sample Citation Forms:

Book: Alfred D. Chandler, Jr., *The Visible Hand: The Managerial Revolution in American Business* (Cambridge, Mass., 1977), 321–22.

Journal: Charles Cheape, “Not Politicians but Sound Businessmen: Norton Company and the Third Reich,” *Business History Review* 62 (Autumn 1988): 444–66.

Note that we do not include the publisher in book citations. We do not use loc. cit., op. cit., or idem., but *ibid.* (not italicized) may be used.

Word-Processing Guidelines

The journal can accept disks of all standard sizes and densities, but they must be formatted in MS-DOS; we cannot use Apple or Macintosh software. WordPerfect is directly compatible, but we may be able to accept your document if it can be converted into an ASCII file.

Potential contributors should submit hard copy, not diskettes, initially, but it will save considerable work for all parties in the event of acceptance if authors working on PCs follow a few rules from the beginning:

In general, use as few formatting commands as possible.

Do not justify or half-justify the right-hand margin.

Do not hyphenate words at the end of lines.

Do not use hard returns except for new paragraphs or required page ends except as absolutely necessary (for example, to break between text and notes).

Do not use special fonts; underline material that is to be set in italics.

Most important, do not use the word processor’s automatic footnote functions: do not embed notes in the text. Notes should be keyed in at the end of the text (after any tables) or as a separate file.
