

arbitration, it does not note of the ongoing work of UNCITRAL Working Group III with respect to the possible reform of investor-state dispute settlement. The chapter also does not mention the developments leading up to UNCITRAL's recent ratification of the final draft of the Singapore Convention, which will make it easier for parties to enforce mediated settlement agreements across jurisdictions and will serve to make mediation a more attractive form of dispute resolution.²

The publication's detailed overview of the International Court of Justice (ICJ) in Chapter 29 is appropriate given the ICJ's significance as the principal judicial body of the UN. The chapter covers a number of topics that will be of interest to legal practitioners, including nominations and election to the bench, the court's functions and jurisdiction, and its internal practices and evidentiary rules. The publication's use of jurisprudence to illustrate its points is particularly effective in these sections, including in its discussion of judges *ad hoc*, and the court's function in issuing advisory opinions. Along with these practical issues, this chapter also covers a number of topics related to the court that perhaps do not receive as much attention in other works, including the ICJ's financing, its independence from other UN organs, and its relationship to other courts and tribunals that determine issues of international law.

The treatise provides a comprehensive analysis of the UN and its bodies that will no doubt be of great use to scholars and practitioners alike.
