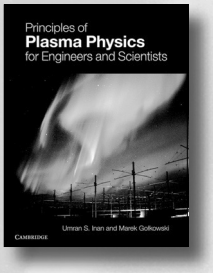
CAMBRIDGE

Noteworthy Titles from Cambridge!

Forthcoming…

Principles of Plasma Physics for Engineers and Scientists



UMRAN S. INAN,
MAREK GOŁKOWSKI

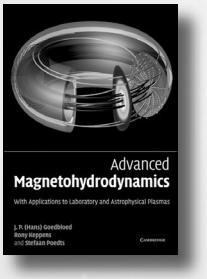
Contents:

1. Introduction; 2. Single particle motion; 3. Kinetic theory of plasmas; 4. Moments of the Boltzmann equation; 5. Multiple fluid theory of plasmas; 6. Single fluid theory of plasmas: magnetohydrodynamics; 7. Collisions and plasma conductivity; 8. Plasma diffusion; 9. Introduction to waves in plasmas; 10. Waves in cold magnetized plasmas; 11. Effects of collisions, ions and finite temperature on waves in magnetized plasmas; 12. Waves in hot plasmas; 13. Plasma sheath and the Langmuir probe; Appendix A. Derivation of second moment of the Boltzmann equation; Appendix B. Useful vector identities.

$99.00: Hb: 978-0-521-19372-6: 300 pp.

Advanced Magnetohydrodynamics

With Applications to Laboratory and Astrophysical Plasmas



J. P. GOEDBLOED,
RONY KEPPENS,
STEFAAN POEDTS

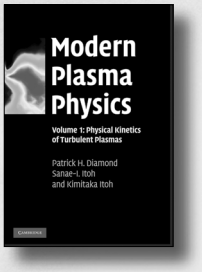
Contents:

Preface; Part III. Flow and Dissipation: 12. Waves and instabilities of stationary plasmas; 13. Shear flow and rotation; 14. Resistive plasma dynamics; 15. Computational linear MHD; Part IV. Toroidal Plasmas: 16. Static equilibrium of toroidal plasmas; 17. Linear dynamics of static toroidal plasmas; 18. Linear dynamics of stationary toroidal plasmas; Part V. Nonlinear Dynamics: 19. Computational nonlinear MHD; 20. Transonic MHD flows and shocks; 21. Ideal MHD in special relativity; Appendices; References; Index.

$190.00: Hb: 978-0-521-87957-6: 656 pp.
$95.00: Pb: 978-0-521-70524-0

Modern Plasma Physics

Volume 1: Physical Kinetics of Turbulent Plasmas



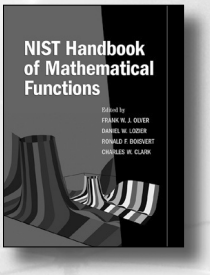
PATRICK H. DIAMOND,
SANAE-I. ITOH,
KIMITAKA ITOH

Contents:

1. Introduction; 2. Conceptual foundations; 3. Quasi-linear theory; 4. Nonlinear wave-particle interaction; 5. Kinetics of nonlinear wave-wave interaction; 6. Closure theory; 7. Disparate scale interactions; 8. Cascades, structures and transport in phase space turbulence; 9. MHD turbulence; Appendixes; References; Index.

$130.00: Hb: 978-0-521-86920-1: 434 pp.

NIST Handbook of Mathematical Functions



EDITED BY
FRANK W. J. OLVER,
DANIEL W. LOZIER,
RONALD F. BOISVERT,
CHARLES W. CLARK

$99.00: Hb: 978-0-521-19225-5
$50.00: Pb: 978-0-521-14063-8:
968 pp.

Prices subject to change.

CAMBRIDGE JOURNALS

journals.cambridge.org

Advancing research. Increasing access.

Informed by detailed consultation with the library and research communities, we are constantly developing our industry-leading online journals platform.

Some recent advances include:

- **Refreshed site design,** facilitating rapid access to the most relevant content.
- **New advanced search interface** and a more detailed, fielded quick search function.
- **Enriched content** in the form of multimedia companions and editorial blogs.
- **Launch of Cambridge Open Option,** our open access initiative.
  Visit **journals.cambridge.org/openoption** for more information.

Editor
Dieter H. H. Hoffmann, GSI Darmstadt, Germany

Laser and Particle Beams is an international journal which deals with basic and applied physics issues of intense laser and particle beams, and the interaction of these beams with matter. Research on pulse power technology associated with beam generation is also of strong interest.

Managing Editor
Simon Mitton, University of Cambridge , UK

Astrobiology combines the sciences of biology, chemistry, palaeontology, geology, atmospheric physics, planetary science, astrophysics and cosmology in the study of the origin, evolution and distribution of life in the universe. The *International Journal of Astrobiology* acts as an important forum for practitioners in this rapidly expanding field.

Editors
S. H. Davis, Northwestern University , USA
M. G. Worster, University of Cambridge, UK

Journal of Fluid Mechanics publishes authoritative articles covering theoretical, computational and experimental investigations of all aspects of the mechanics of fluids. Papers discuss both the fundamental aspects of fluid mechanics, and their applications to other fields such as aeronautics, astrophysics, physiology, chemical and mechanical engineering, oceanography, geology, and combustion.

Instructions for Authors

Editorial policy The journal welcomes submissions in any of the areas of plasma physics. Its scope includes experimental and theoretical work on basic plasma physics, the plasma physics of magnetic and inertial fusion, laser–plasma interactions, industrial plasmas, plasma devices and plasmas in space and astrophysics. This list is, of course, merely illustrative of the wide range of topics on which papers are invited, and is not intended to exclude any aspect of plasma physics that is not explicitly mentioned.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers. Manuscripts must be written in English. *Journal of Plasma Physics* employs a rigorous peer-review process whereby all submitted manuscripts are sent to recognized experts in their subjects for evaluation. The Editors' decision on the suitability of a manuscript for publication is final.

Submission of manuscripts Papers may be submitted to the Editor or any of the Associate Editors, preferably by email in pdf format. When a paper is accepted, the authors will be asked to supply source files in LaTeX or Word. Instructions for the preparation of these files and LaTeX style files are given in the Instructions for Contributors link at journals.cambridge.org/pla.

Incremental publishing and DOIs In order to make articles which have been accepted for publication in *Journal of Plasma Physics* available as quickly as possible, they are now published incrementally online (at Cambridge Journals Online; journals.cambridge.org) The online version is available as soon as author corrections have been completed and before the article appears in a printed issue. A reference is added to the first page of the article in the journal catchline. This is the DOI – Digital Object Identifier. This is a global publishers' standard. A unique DOI number is created for each published item. It can be used for citation purposes instead of volume, issue and page numbers. It therefore suits the early citation of articles which are published on the web before they have appeared in a printed issue. See journals.cambridge.org/pla.

Proof reading Only typographical or factual errors may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Offprints Corresponding authors will receive a PDF of their article upon publication. Print offprints may be purchased from the publisher if ordered at first proof stage.

Copying This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of $16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022–3778/2010 $16.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

JOURNAL OF
PLASMA PHYSICS

VOLUME 76 • PART 6 • DECEMBER 2010

Guest Editors: Luis O. Silva, Robert Bingham, Mattias Marklund, Padma K. Shukla and Raoul Trines

Tribute to Professor Tito Mendonça on the occasion of his 65th birthday
C. Varandas 809

Preface 811

Main Articles

Relativistic effects on the collisionless–collisional transition of the filamentation instability in fast ignition
M. Fiore, F. Fiúza, M. Marti, R. A. Fonseca and L. O. Silva 813

On the quantum space–time structure of light
A. Guerreiro 833

Instability of plasma waves caused by incoherent photons in dense plasmas
P. K. Shukla, L. Stenflo and R. Bingham 845

Stimulated Brillouin scattering of electromagnetic waves in magnetized plasmas
P. K. Shukla and L. Stenflo 853

Circularly polarized modes in magnetized spin plasmas
A. P. Misra, G. Brodin, M. Marklund and P. K. Shukla 857

Effects of the electron spin on the nonlinear generation of quasi-static magnetic fields in a plasma
M. Stefan, G. Brodin, F. Haas and M. Marklund 865

Nonlinear propagation of intense electromagnetic waves in a hot electron–positron plasma
Rozina Chaudhary, Nodar L. Tsintsadze and P. K. Shukla 875

Magnetization of electron–positron plasmas by Laguerre–Gaussian light beams
P. K. Shukla and B. Eliasson 887

Nonlinear electromagnetic wave interactions in Hall–MHD plasmas
Dastgeer Shaikh and P. K. Shukła 893

Applications of the wave kinetic approach: from laser wakefields to drift wave turbulence
R. M. G. M. Trines, R. Bingham, L. O. Silva, J. T. Mendonça, P. K. Shukla, C. D. Murphy, M. W. Dunlop, J. A. Davies, R. Bamford, A. Vaivads and P. A. Norreys 903

Electron energization in lunar magnetospheres
R. Bingham, R. Bamford, B. J. Kellett and V. D. Shapiro 915

An analytic model of plasma-neutral coupling in the heliosphere plasma
Dastgeer Shaikh and B. Dasgupta 919

New low-frequency waves and negative mass instability in dusty plasmas
D. P. Resendes, R. Bingham, S. Mota and V. N. Tsytovich 929
