(Article appeared in *Laser and Particle Beams* (2002), 20, 471–474.)

The coefficients A_i , that enter the fit formula for the stopping power (6), are given incorrectly in table 1. The table gives expressions for the quantities A_i^2 , rather than the coefficients A_i as printed. Therefore, the square root of the given expressions should be computed to obtain A_i . The given accuracy of the fit is reported correctly since it was obtained using the correct coefficients.
