**"Charles...I want you to pick up Dr. Martinelli  
in Turin and fly him to Madrid...  
take his proposals to Lyons in the afternoon  
...and be back here for the meeting tomorrow."**

**"But Sir,..."**

This is the kind of schedule that can leave a senior executive shattered rather than dynamic and confident.

Waiting around in airport lounges and hotels adds up to a terrible waste of a company's most precious asset – the time of its top decision-makers.

And that is precisely why the Hawker Siddeley 125 is such a significant and vital management tool.

The HS 125 flies at over 500 mph which, with its range of more than 1700 miles puts any European business centre within commuting distance.

By flying from smaller airfields closer to your departure and destination points it can cut overall travel time by an average of 50%. It flies when and where you want it to.

So, if you want to increase the effectiveness of your top executives, talk to the Sales Manager at Hatfield 62345.
