Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 18 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 22, 2019 (18 issues):
Internet/print package: £1325/\$2542 Americas only/€2124 EU only
Internet only: £959/\$1820 Americas only/€1525 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and which are not, and will not be obliged to give reasons to prospective

advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to Cambridge University Press
1 Liberty Plaza
Floor 20, New York

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing

interests. The submission must include a statement within an Acknowledgements section reporting any competing interests (financial and non-financial), all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

HOT TOPIC: Child/Adolescent Nutrition

Challenges in child and adolescent nutrition
A Hodge 1

Evaluating interventions to improve child nutrition in Eastern Democratic Republic of Congo
S Doocy, J Emerson, E Colantouni, J Strong, K Amundson-Mansen, the Jenga Jamaa II Study Team and J Menakuntuala 3

Potential interventions targeting adolescent nutrition in Indonesia: a literature review
VM Oddo, A Roshita and JH Rah 15

The effects of a nutrition education curriculum on improving young children's fruit and vegetable preferences and nutrition and health knowledge
SA Schmitt, LM Bryant, I Korucu, L Kirkham, B Katare and T Benjamin 28

Co-morbid anaemia and stunting among children of pre-school age in low- and middle-income countries: a syndemic
TD Tran, B-A Biggs, S Holton, HTM Nguyen, S Hanieh and J Fisher 35

Intra-household double burden of malnutrition in a North African nutrition transition context: magnitude and associated factors of child anaemia with mother excess adiposity
S Sassi, MM Abassi, P Traissac, HB Gharbia, A Gartner, F Delpuech and JE Ati 44

Stunting and its associated factors among 6–7-year-old children in southern Iran: a nested case-control study
MJ Fatemi, M Fararouei, H Moravej and M Dianatinasab 55

The cross-sectional relationships between consumption of takeaway food, eating meals outside the home and diet quality in British adolescents
AK Taher, N Evans and CEL Evans 63

High-risk environments for eating foods surplus to requirements: a multilevel analysis of adolescents' non-core food intake in the National Diet and Nutrition Survey (NDNS)
Z Toumpakari, K Tilling, AM Haase and L Johnson 74

Individual-, maternal- and household-level factors associated with stunting among children aged 0–23 months in Bangladesh
SK Mistry, Md B Hossain, F Khanam, F Akter, M Parvez, F Md Yunus, K Afsana and M Rahman 85

Does parental migration have any impact on nutritional disorders among left-behind children in Bangladesh?
MM Islam, Md N Khan and Md NI Mondal 95

Infant and young child feeding practices, sociodemographic factors and their association with nutritional status of children aged <3 years in India: findings of the National Nutrition Monitoring Bureau survey, 2011–2012
II Meshram, KM Rao, N Balakrishna, R Harikumar, N Arlappa, K Sreeramakrishna and A Laxmaiah 104

Food insufficiency is associated with depression among street-involved youth in a Canadian setting
J Goldman-Hasbun, E Nosova, K DeBeck, L Dahlby and T Kerr 115

Nutritional status and related factors of schoolchildren in Çorum, Turkey
A Comba, E Demir and NB Eren 122

Agreement of body adiposity index (BAI) and paediatric body adiposity index (BAIp) in determining body fat in Brazilian children and adolescents
M De S Filgueiras, RS Cecon, ER de Faria, FR de Faria, PF Pereira, A Q Ribeiro, SE Priore and JF de Novaes 132

Waist circumference, waist-to-height ratio and conicity index to evaluate android fat excess in Brazilian children
M De S Filgueiras, SA Vieira, PC de A Fonseca, PF Pereira, AQ Ribeiro, SE Priore, S do CC Franceschini and JF de Novaes 140

Weight estimation among multi-racial/ethnic infants and children aged 0–5.9 years in the USA: simple tools for a critical measure
Y Zhu, LM Hernandez, Y Dong, JH Himes, LE Caulfield, JM Kerver, L Arab, P Voss, S Hirschfeld and MR Forman 147

Mediators of the effectiveness of a kindergarten-based, family-involved intervention on pre-schoolers' snacking behaviour: the ToyBox-study
C-P Lambrinou, MM van Stralen, O Androutsos, G Cardon, M De Craemer, V Iotova, P Socha, B Koletzko, LA Moreno and Y Manioson on behalf of the ToyBox-study group 157

The factors associated with food fussiness in Irish school-aged children
S Rahill, A Kennedy, J Walton, BA McNulty and J Kearney 164

Prevalence thresholds for wasting, overweight and stunting in children under 5 years
M de Onis, E Borghi, M Arimond, P Webb, T Croft, K Saha, LM De-Regil, F Thuita, R Heidkamp, J Krasevec, C Hayashi and R Flores-Ayala 175

Workforce development

Using unfolding case studies to better prepare the public health nutrition workforce to address the social determinants of health
C Palermo, S Kleve, J McCartan, J Brimblecombe and M Ferguson 180

Corrigendum

Availability, quality and price of produce in low-income neighbourhood food stores in California raise equity issues - CORRIGENDUM
W Gosliner, DM Brown, BC Sun, G Woodward-Lopez and PB Crawford 184

Public policies

Sugar-sweetened beverage taxation in 2017: a commentary on the reasons behind their quick spread in the EU compared with the USA
LL Hageaars, PPT Jeurissen and NS Klazinga 186

Sugar-sweetened beverage taxation in the USA, state preemption of local efforts
JL Pomeranz and M Pertschuk 190
