

INSTRUCTIONS FOR CONTRIBUTORS

PAPERS Papers for publication from Europe and Australasia, except those on genetic topics, should be addressed to the UK Editor, Professor Robin M Murray, Psychological Medicine Editorial Office, Douglas House, 18E Trumpington Road, Cambridge CB2 8AH, UK, E-mail: lgs21@cam.ac.uk. Papers from the Americas, Asia, Africa and the Middle East, and all papers dealing with genetic topics, irrespective of country, should be sent to the US Editor, Professor Kenneth S Kendler, MCV, PO Box 980126, Richmond, VA, 23298-0126, USA (Street address: Virginia Biotechnology Center One, Room 1-123, 800E Leigh Street, Richmond, VA, 23219, USA), Email: bherrmann@vcu.edu.

Submissions by email attachments are preferred. Alternatively contributors who wish may send one hard copy of the text, tables and figures, plus an identical copy on computer disk, giving details of format used (e.g. MS Word etc.). Authors should also accompany their submission with a list of 5 or more suggested suitable referees to aid the peer review process.

A covering letter signed by all authors should confirm agreement to submission. The letter should also give full mailing, fax and email contact details of the author who will handle correspondence. Submission of a paper will be held to imply that it contains original work that has not been previously published and that it is not being submitted for publication elsewhere. This should be confirmed in the letter of submission. When an article has been accepted for publication, the authors should email their final version or send a copy on computer disk (indicating format used, e.g. Mac/PC, MS Word/Word Perfect, etc.) together with one hard copy of the typescript and good quality copies of all tables, figures, etc. However, the publisher reserves the right to typeset the material by conventional means if an author's disk proves unsatisfactory.

The following information must be given on the first page (title sheet): (1) title and short title for running head (not more than 60 characters); (2) authors' names, (3) department in which the work was done, (4) word count of text excluding abstract, tables/figures and reference list. Generally papers should not have text more than 4500 words in length (excluding these sections) and should not have more than a combined total of 5 tables and/or figures. Papers shorter than these limits are encouraged. For papers of unusual importance the editors may waive these requirements. A structured abstract of no more than 250 words should be given at the beginning of the article using the headings: Background; Methods; Results; Conclusions. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

Declaration of Interest: A statement must be provided in the acknowledgements listing all financial support received for the work and, for all authors, any financial involvement (including employment, fees, share ownership) or affiliation with any organization whose financial interests may be affected by material in the manuscript, or which might potentially bias it. This applies to all papers including editorials and letters to the editor.

Contributors should also note the following:

1. S.I. units should be used throughout in text, figures and tables.
2. Authors should spell out in full any abbreviations used in their manuscripts.
3. Foreign quotations and phrases should be followed by a translation.
4. If necessary, guidelines for statistical presentation may be found in: **Altman DG, Gore SM, Gardner MJ & Pocock SJ** (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

REFERENCES (1) The Harvard (author-date) system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by et al. (but the names of all of the authors should be given in the References section). Where several references are cited together they should be listed in rising date order. (2) The References section should be supplied in alphabetical order (authors' names in **bold**, journal titles in full), following the text. Some examples follow:

Miller PM, Byrne M, Hodges A, Lawrie SM, Johnstone EC (2002). Childhood behaviour, psychotic symptoms and psychosis onset in young people at high risk of schizophrenia: early findings from the Edinburgh high risk study. *Psychological Medicine* **32**, 173–179.

Cleckley HJ (1941). *The Mask of Sanity*, 2nd edn. Mosby: St. Louis, MO.

Brewer WJ, Wood SJ, DeLuca C, Pantelis C (2006). Models of olfaction for exploring neurodevelopment. In *Olfaction and the Brain* (ed. W. J. Brewer, D. Castle and C. Pantelis), pp. 97–121. Cambridge University Press: Cambridge.

[Authors are requested to print-out and keep a copy of any online-only material, in case the URL changes or is no longer maintained.]

FIGURES AND TABLES Only essential figures and tables should be included. Further tables, figures, photographs and appendices, may be included with the online version on the journal website. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal. **Line artwork:** Format: tif or eps, Colour mode: black and white (also known as 1-bit), Resolution: 1200 dpi; **Combination artwork (line/tone):** Format: tif or eps, Colour mode: grayscale (also known as 8-bit), Resolution: 800 dpi; **Black and white halftone artwork:** Format: tif, Colour mode: grayscale (also known as 8-bit), Resolution: 300 dpi; **Colour halftone artwork:** Format: tif, Colour mode: CMYK colour, Resolution: 300 dpi. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in Arabic numerals. Captions for figures should be typed double-spaced on separate sheets. **Tables** Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

PROOFS AND OFFPRINTS Page proofs will be sent to the author designated to receive correspondence. corrections other than to printer's errors may be charged to the author. Fifty offprints of each paper are supplied free; additional offprints are available according to a scale of charges if they are ordered on the form supplied when the proof is returned.

PSYCHOLOGICAL MEDICINE

CONTENTS

In this Issue	1053	Implications of modifying the duration requirement of generalized anxiety disorder in developed and developing countries	
REVIEW ARTICLES		Lee S, Tsang A, Ruscio AM, Haro JM, Stein DJ, Alonso J, Angermeyer MC, Bromet EJ, Demyttenaere K, de Girolamo G, de Graaf R, Gureje O, Iwata N, Karam EG, Lepine J-P, Levinson D, Medina-Mora ME, Oakley Browne MA, Posada-Villa J & Kessler RC	1163
Anxiety: its role in the history of psychiatric epidemiology	1055		
Murphy JM & Leighton AH			
Spontaneous movement disorders in antipsychotic-naive patients with first-episode psychoses: a systematic review	1065	Influence of the fusiform gyrus on amygdala response to emotional faces in the non-clinical range of social anxiety	
Pappa S & Dazzan P		Pujol J, Harrison BJ, Ortiz H, Deus J, Soriano-Mas C, López-Solà M, Yücel M, Perich X & Cardoner N	1177
ORIGINAL ARTICLES		fMRI changes over time and reproducibility in unmedicated subjects at high genetic risk of schizophrenia	
Mechanisms of gene-environment interactions in depression: evidence that genes potentiate multiple sources of adversity	1077	Whalley HC, Gountouna V-E, Hall J, McIntosh AM, Simonotto E, Job DE, Owens DGC, Johnstone EC & Lawrie SM	1189
Wichers M, Schrijvers D, Geschwind N, Jacobs N, Myin-Germeyns I, Thiery E, Derom C, Sabbe B, Peeters F, Delespaul Ph. & van Os J		High serum levels of leptin are associated with post-stroke depression	
A comparison of the predictive abilities of dimensional and categorical models of unipolar depression in the National Comorbidity Survey	1087	Jiménez I, Sobrino T, Rodríguez-Yáñez M, Pouso M, Cristobo I, Sabucedo M, Blanco M, Castellanos M, Leira R & Castillo J	1201
Prisciandaro JJ & Roberts JE		Evaluation sensitivity as a moderator of communication disorder in schizophrenia	
Neural correlates of attention biases of people with major depressive disorder: a voxel-based morphometric study	1097	Grant PM & Beck AT	1211
Leung K-K, Lee TMC, Wong MMC, Li LSW, Yip PSF & Khong P-L		BOOK REVIEWS	
Accuracy of specific symptoms in the diagnosis of major depressive disorder in psychiatric out-patients: data from the MIDAS project	1107	<i>Therapeutic Communities for Psychosis: Philosophy, History and Clinical Practice</i>	
Mitchell AJ, McGlinchey JB, Young D, Chelminski I & Zimmerman M		Isohanni M	1221
Immigration to the USA and risk for mood and anxiety disorders: variation by origin and age at immigration	1117	<i>Treating Bulimia Nervosa and Binge Eating: An Integrated Metacognitive and Cognitive Therapy Manual</i>	
Breslau J, Borges G, Hagar Y, Tancredi D & Gilman S		Treasure J	1222
Impact of stress on paranoia: an experimental investigation of moderators and mediators	1129	<i>Mood Disorders in Later Life, 2nd edn</i>
