

# Review Papers for the Journal of Applied Probability

---

The Editorial Board would like to encourage the submission to the *Journal* of Review Papers summarising and coordinating recent results in any of the fields of Applied Probability. The papers should be approximately 40–50 printed pages in length.

On acceptance of a Review Paper for publication in the *Journal*, the author will receive £ stg. 100 (\$280). The paper will then be distributed as a book in paperback form in the following series.

## Methuen's Supplementary Review Series in Applied Probability

*General Editor:* M. S. BARTLETT, M.A., D.SC., F.R.S.

*Editor:* J. GANI, D.I.C., PH.D.

---

This supplementary series consists of the Review Papers from the *Journal of Applied Probability* in book form. The Review Series is designed to bridge the gap between the publication of research papers and the advent of a book coordinating their results. Consecutive volumes written in a simple expository style, will provide research workers and students of Applied Probability with up-to-date accounts of work done in their fields. The series deals with the applications of Probability Theory to the biological, physical, social and technological sciences.

### *Already Published*

- Volume 1. TIME-DEPENDENT RESULTS IN STORAGE THEORY  
by N. U. Prabhu
- Volume 2. DIFFUSION MODELS IN POPULATION GENETICS  
by M. Kimura
- Volume 3. GROUP REPRESENTATIONS AND APPLIED PROBABILITY  
by E. J. Hannan
- Volume 4. STOCHASTIC MODELS FOR BACTERIOPHAGE by J. Gani
- Volume 5. RECENT RESULTS IN INFORMATION THEORY by S. Kotz
- Volume 6. ON THE ALGEBRA OF QUEUES by J. F. C. Kingman
- Volume 7. COMPLETE EXPONENTIAL CONVERGENCE AND SOME  
RELATED TOPICS by C. R. Heathcote

### *In Press*

- Volume 8. STOCHASTIC APPROACH TO CHEMICAL KINETICS by D. A. McQuarrie

Orders for these should be made through your bookseller or direct from:  
Methuen & Co. Ltd.

11 NEW FETTER LANE LONDON EC4

### Subscription rates

Subscriptions (post free) for the annual volume of the *Journal* are:

U.S. \$15, £stg. 5.5.0, \$A. 13.40, for libraries and institutions;

U.S.\$8, £stg. 2.16.0, \$A. 7.20, for individuals belonging to a recognised scientific society.

Members of the London Mathematical Society should apply direct to the Secretary of the Society for copies of the *Journal*.

All enquiries about the *Journal*, as well as other subscriptions and orders for back numbers should be sent to the Editorial Assistant, Miss M. Hitchcock, Department of Probability and Statistics, The University, Sheffield, S3 7RH, England. The price of back numbers is \$ 16.90, £stg. 5.18.0, \$A. 15.10 per volume. Cheques, money orders, etc. should be made out to the *Journal of Applied Probability*; cheques on U.S., U.K. and Australian banks will be acceptable.

### Notes for Contributors

It is a condition of publication in the *Journal of Applied Probability* that papers shall not previously have appeared elsewhere, and will not be reprinted without the written permission of the Trust. The copyright of all published papers shall be vested in the Trust. It is the general policy of the *Journal* not to accept for publication papers which cannot appear in print within 15 months of their date of submission. Authors will receive 100 reprints of their papers free, and joint authors 50 each, except for authors of review papers, who will receive 10 copies free. Additional reprints will be provided at cost.

Manuscripts should be written in English or French; manuscripts in other languages may be accepted by the Editors, but will appear (subject to the author's agreement) in English or French translation in the *Journal*.

It will be of help to the Editors if the following conventions are adopted:

a) The manuscript should be typewritten, using double spacing, on one side of the paper only. The original and a copy, may be submitted to any Editor; a duplicate of the covering letter should, however, be sent to the Editor-in-Chief.

b) References should be indicated in the text by the name of the author(s) and the date, thus: Feller (1961), and the full references listed at the end of the article in alphabetical order. Journal references should include the title of the article cited, the title of the journal (abbreviated in the style of the *International Journal of Abstracts: Statistical Theory and Method*) the volume, and inclusive page numbers. Book references should give the full title, the publisher, and the place of publication. For example:

Feller, W. (1961) A simple proof of renewal theorems. *Comm. Pure Appl. Math.* **14**, 285–293.

Robinson, E. A. (1959) *An Introduction to Infinitely Many Variates*. Griffin, London.

c) Type faces should be carefully distinguished on the manuscript using the following standard methods of marking:

Italic capitals (*T, I, R*) and lower case letters (*t, i, r*) should be underlined once, e.g., T, I, R, t, i, r.

Bold-face capitals (**T, I, R**) and lower case letters (**t, i, r**) should have a curly underline, e.g., T, I, R, t, i, r.

Greek characters ( $\alpha, \beta, \theta$ ) and script letters ( $\mathcal{J}, \mathcal{I}, \mathcal{R}$ ) should be carefully drawn and identified when first used by a marginal note of the form 'a—lower case Greek alpha' or  $\mathcal{R}$ —script R'.

d) Indices and subscripts should be clearly distinguished, using the marking  $\overset{4}{\underbrace{\quad}}$ ,  $\underset{4}{\hat{\quad}}$  where necessary.

Authors will receive only first proofs for correction; charges will be made for excessive alteration to these.

# *Journal of Applied Probability*

Volume 4

Number 3

December 1967

*Review Paper*

- DONALD A. McQUARRIE 413 Stochastic approach to chemical kinetics

*Research Papers*

- W. SMITH AND G. S. WATSON 479 Diffusion out of a triangle
- E. SENETA 489 The Galton-Watson process with mean one
- J. N. DARROCH AND K. W. MORRIS 496 Some passage-time generating functions for discrete-time and continuous-time finite Markov chains
- RICHARD A. OLSHEN 508 Asymptotic properties of the periodogram of a discrete stationary process
- T. LEWIS 529 The factorisation of the rectangular distribution
- MORRIS SKIBINSKY 543 The range of the  $(n + 1)$ th moment for distributions on  $[0, 1]$
- C. PEARCE 553 Queues with moving average service times
- DAVID K. HILDEBRAND 571 Stability of finite queue, tandem server systems
- JOHN BATHER AND HERMANN CHERNOFF 584 Sequential decisions in the control of a space-ship (finite fuel)

*Short Communications*

- MEYER DWASS 605 Poisson recurrence times
- CHARLES J. MODE 609 Some corrections to my paper "A stochastic calculus and its application to some fundamental theorems of natural selection"
